

It's greener in more ways than one.

The Airbus A380 has earned its reputation as the world's greenest long-haul jet. But it's been earning hard dollars at the same time. The moment it entered service, its sheer popularity, combined with the lowest cost per passenger of any large aircraft, has meant more profit, much quicker. Giving its operators a competitive edge in tough times. Simply by introducing A380s on long-haul routes, operators can save millions of dollars a year in cash operating costs, while creating thousands of extra seats. The most exciting plane in the sky is also a proven, working aircraft, making real money, day after day. **Airbus A380. See the bigger picture.**
