

# A330-200F

The right aircraft, right now

New Standards. Together

# Efficient, Profitable, Reliable

Based on the highly successful A330-200, the A330-200F is the only new mid-size, long-haul freighter.

This flexible and technologically advanced aircraft builds on Airbus' successful experience in the regional freighter market and benefits from the experience of more than 1,400 A330/A340 Family aircraft already sold.

The A330-200F has payload, range and economics superior to previous generation freighters, carrying 65 tonnes over 4,000nm / 7,400km and 70 tonnes up to 3,200nm / 5,950km.

The versatile main deck of the A330-200F accommodates both pallets and containers in a variety of arrangements, taking up to 23 side-by-side pallets or 16 in a single row, in addition to 8 lower deck pallets or 26 LD3s.

Capacity	MTOW	Range	Powerplants
65.0 t	233.0t / 513 700lb	4,000nm / 7,400km	PW4000 or RR Trent 700
70.0 t	227.0t / 500 400lb	3,200nm / 5,950km	PW4000 or RR Trent 700
