

Greener.

The Airbus A380 is built to be greener overall, not just because of its highly efficient design and new generation engines, but also thanks to a commitment from Airbus to reduce the total environmental impact of its aircraft. Airbus is the only manufacturer in the aviation industry to meet the strict ISO 14001 environmental management standards, covering all its manufacturing sites and products. Making the A380 a greener aircraft at every stage of its life cycle, from when we start putting it together to when it is finally taken apart. **Airbus A380. See the bigger picture.**
