At Airbus Helicopters in North America, our engineering excellence and completions capability is an integral part of meeting your operating requirements.

We are committed to providing OEM approved equipment modifications that further enhance your experience with our product line. This catalogue illustrates a grouping of our most important and interesting options available for the H125, H130, H135, and H145 aircraft families.

Airbus Helicopters, Inc. is a certified “Design Approval Organization” by the Federal Aviation Administration.

Airbus Helicopters Canada is a certified “Design Approval Organization” by Transport Canada.

As customer centers, we have also been recognized as an Authorized Design Organization by the Airbus Helicopters Group (AH Group).

For more information, please visit Airbus World or see contact information on the next page. Airbus Helicopters' Airbus World customer portal eases customers’ daily operations and allows them to focus on what really matters: their business. Airbus World is an innovative online platform for accessing technical publications, placing orders and quotations, managing fleet data as well as warranty claims, and receiving quick responses to support and services questions.

Airbus Helicopters reserves the right to make configuration and data changes at any time without notice. The facts and figures contained in this document are expressed in good faith and do not constitute any offer or contract with Airbus Helicopters.

Product Description

**AS350/H125**
AS350 B, B1, B2, B3, D

---

**HIGH VISIBILITY COCKPIT** - Part # 350A82-1645-05

This modification replaces the full panel with a high visibility half panel, to increase visibility and practical usable space in the left side of the cockpit. Instrument panel includes cutouts for TCG500 and ESI2000.

---

**Benefits**

- Increased visibility for pilot and passengers (great for tour operations)
- Increased practical usable space
- Reduced panel weight

**Weight:** 2.27 kg (5 lb)  -  **Approvals:** USA, Canada
LEAD ACID BATTERY STANDARD LOCATION - Part # 350A82-1585-01

The battery installation consists of a Concorde Lead Acid battery RG-350. The Concorde lead acid battery is a recombinant gas lead acid battery that replaces the standard aircraft Nickel Cadmium battery.

Benefits
- Environmentally responsible (no HAZMAT)
- Maintenance-free, non-spillable
- Very low impedance design

Weight: 18.6 kg (41 lb) - Approvals: USA, Canada
Optional Equipment

Product Description

AS350/H125
AS350 B2, B3

ONE INCH ANTI-TORQUE PEDALS EXTENSION - Part # 350A73-1572-01/02

A one inch outboard extension of left hand and right hand anti-torque pedals increasing the area to rest your feet on.

Benefits

- More space in the area where you rest your feet
- Allows you to wear wider/larger shoes/boots

Weight: Negligible - Approvals: USA, Canada
Optional Equipment

Product Description

AS350/H125
AS350 B2, B3

DUAL USB CHARGING PORT - Part # 1846940

The self-contained TA102 Dual USB Charging Port is a modern addition to any cockpit and interior cabin. Each USB port is designed to supply the electric current needed to charge any standard or high-power device with a USB interface. The TA102 protects itself and the charging device from short-circuit, power surges and over-current potential.

Benefits
- Charge one or two products simultaneously at full power
- Short-circuit, over-current, and over-temperature protection
- Panel or cabin mount

Specifications
- Output Power: 2.1 amps per port
- Input Voltage: 10 – 32 VDC
- Output Voltage: 5 VDC ± 0.25 per port

Weight: Negligible - Approvals: USA, Canada
Optional Equipment

Product Description

**AS350/H125**

AS350 B2, B3

**BOSE HEADSET JACKS** - Part # 323172-0010

With these Bose headset jacks installed you can directly plug in and connect your Bose headsets that give greater noise reduction than conventional aviation headsets. These headset jacks can be installed for the pilot, co-pilot, and all passengers.

Benefits

- Directly plug in and connect your Bose headsets
- Great noise reduction, noise cancellation

**Weight:** Negligible  
**Approvals:** USA, Canada
Optional Equipment

Product Description
AS350/H125
AS350 B2, B3

SWIVELING RETRACTABLE AND DIRECTIONAL LANDING LIGHT - Part # 350A73-1884-02

Installation of a 450 W retractable and swiveling landing light located at the front belly panel. Landing Light (swiveling in elevation and azimuth) enhances safety when approaching the ground and during helicopter maneuvers on the ground.

Benefits
- Improves visibility during approach
- Range angle capacities: 110° vertically and 360° horizontally

Weight: 6 kg (13.22 lb) - Approvals: USA, Canada, EASA, Brazil, Mexico
Optional Equipment

Product Description
AS350/H125
AS350 BA, B2, B3

DUAL CONTROLS WITH TWIST GRIP - Part # 350A82-2056-00

These dual controls with twist grip can be fitted in the left hand station of the aircraft for training flights or flights requiring a pilot and copilot. These dual controls comprise, 1 cyclic pitch control stick with protection boot, 1 collective pitch lever with twist grip, boot and protection shield, 1 set of tail rotor control pedals with protective brush, and 1 cut off switch at the base of the cyclic pitch control stick.

Benefits
- Allows for the use of dual controls
- Aircraft can be flown from left seat

Weight: 2.14 kg (4.7 lb) - Approvals: USA, Canada

© January 2020 Airbus Helicopters, all rights reserved.
Optional Equipment

Product Description

**AS350/H125**

AS350 BA, B2, B3

---

**GARMIN GTS800 TAS** - Part # 350A82-1657-01

See and avoid other aircraft (in busy, high-density airspace) that may be climbing, descending, or cruising in the vicinity. The GTS800 includes ADS-B enhanced Traffic Advisory (TAS) and Traffic Collision Avoidance (TCAS I) systems featuring CLEAR CAS™ technology. The GTS800 provides accurate, dynamic traffic surveillance with ATC-like spoken audio alerts to help the pilot quickly respond to potential flight path encroachments.

**Benefits**

- Actively tracks up to 45 targets to 22 nm
- Combines active surveillance with passive (ADS-B) surveillance
- Generates aural and visual traffic advisories
- Interfaces with a range of displays

**Weight:** 4.08 kg (9.0 lb) - **Approvals:** USA, Canada, EASA, Brazil
Optional Equipment

Product Description

**AS350/H125**

AS350 BA, B2, B3

---

**GARMIN GRA5500 RADAR ALTIMETER** - Part # 350A82-1643-06

Designed to work with 3rd party equipment and Garmin flight displays like the G500, G500H and G600, the GRA 5500 conveniently puts your AGL readout right in front of you. This display integration, along with its reliability and accuracy, make it an optimal solution for operators equipping for NVIS operations. The GRA 5500 also integrates with the GTS 8000 and GTX 3000 to provide a complete TCAS II system, and satisfies radar altimeter requirements for Class A TAWS systems and CAT II ILS operations.

---

**Benefits**

- All-digital design provides smooth, consistent readout
- Meets requirements for Class A TAWS and TCAS II/ACAS II
- Meets requirements for CAT II ILS operations
- High quality accuracy, rugged and reliable
- Interfaces with Garmin flight displays and 3rd party equipment

**Weight:** 1.60 kg (3.5 lb) - **Approvals:** USA, Canada, EASA, Brazil, Mexico

---

GENESYS HELISAS AUTOPILOT - Part # SR02345LA

The Genesys Helisas Autopilot is a helicopter autopilot for light and medium rotorcraft and helps with dramatically reducing the pilot’s workload while providing precise control during all modes of flight, regardless of wind conditions or shifts in weight. The HeliSAS stability augmentation system is designed to be engaged at all times. “SAS on” before takeoff and “SAS off” after landing to provide unmatched stability and ease of handling, and reduce the pilot’s workload to make it easier to adjust radios, set destinations, etc.

Benefits

- Dramatic reduction in pilot workload
- Course intercept capability, HDG to NAV
- A two-axis autopilot providing both lateral and vertical functions
- Auto-recover to a neutral attitude in situations where the pilot may lose visual reference (SAS)

Weight: 6.8 kg (15 lb) - Approvals: USA, Canada, EASA, Brazil, Mexico
Optional Equipment

Product Description

**AS350/H125**

AS350 B, B1, B2, B3, D

**PUREAIR SYSTEM - Part # PA100**

A totally redesigned, reengineered and retested engine air protection system that goes above and beyond its predecessor. The PA100 PUREair System increases operational availability and aircraft performance, while reducing overall maintenance and operational costs. Major improvements on the redesigned system:

- Improved dust separation efficiency for AS350B/B1/B2/B3/BA
- New panel location, latest generation of vortex tubes and revised tube layout.
- Reduced bleed air
- Optimized ejector design and no P2 bleed air valve
- Filter efficient at all times
- Improved FOD protection
- New downstream FOD screen sitting on engine inlet
- FOD protection even when cowl is open
- Easier to install and maintain
- Simplified installation (no P2 air valve)
- No barrier filters to clean.

**Benefits**

- Fit and Forget: Self-cleaning system is virtually maintenance free
- Better protection in all weather conditions
- Reduction of engine erosion damage
- Environmentally friendly solution: no need for chemical cleaning and filter replacement
- Increased protection against hot gas ingestion

**Weight:** 27.66 kg (61 lb)  
**Approvals:** USA, Canada, Brazil, EASA, Japan
Optional Equipment

Product Description

**AS350/H125**

AS350 B, B1, B2, B3, D

**INLET BARRIER FILTER** - Part # 112005-101/103

This AFS Inlet Barrier Filter system extends engine life through the elimination of erosion. This option is an effective way to protect engines from damage resulting from dust, sand and debris that attack turbine engines and impact engine reliability. Single, rugged, lightweight, flat filter common to many AS350 models, utilizing captive fasteners allowing fast filter exchange; additional self-contained and structurally integrated fairing assembly mounted into the top of the existing engine inlet cowling; simple installation with minimal modifications. Emergency Bypass Aft-facing bypass door to protect against dirt & snow; no flight restrictions with bypass open. Components easily accessible and common to other models; non-intrusive cockpit installation; components easily inspected via bypass door or integral sight glass; filter maintenance aid for on-condition assessment of filter status while aircraft is on the ground.

**Benefits**

- Reduced engine turbine operating temperatures
- Longer engine life due to complete elimination of erosion and FOD
- Improved flight safety, especially in falling snow conditions

**Specifications FDC**

**Weight:** 6.35 kg (14 lb)  
**Approvals:** USA, Canada, EASA, Brazil

Return to the Table of Contents
Optional Equipment

Product Description
AS350/H125
AS350 B, B1, B2, B3, BA, C, D, D1

RSG CABIN AIR CONDITIONING SYSTEM - Part # 350-00-011-HP

The purpose of this installation is to maintain the cabin temperature at a comfortable level in hot weather conditions. The installation consists of a single 7” condenser blower motor located in the right hand side baggage compartment, a dual 5” condenser blower motor located in the tailboom compartment, and has dual air distribution with multiple speed fans and controls. The control box is located on the instrument panel or console, depending on the helicopter's configuration, and a fuse box located on the instrument panel, beneath the control box.

Benefits
• Compressor provides 28,500 BTU with dual evaporators
• Highly reliable, low noise, brushless motor assemblies
• Lightweight

Weight: 36.30 kg (80 lb) - Approvals: USA, Brazil, EASA
CARGO SWING (1,400KG - 3,080 LB) - Part # 06-27008-00-FP

Used to undersling heavy and voluminous loads outside the helicopter for a maximum weight of 1,400 kg / 3,080 lb. The cargo swing consists of the following components: 4 attachment points located under the front and rear landing gear cross tubes, 1 cargo swing assembly, 1 control and monitoring circuit, 1 emergency mechanical control system, holes in the lower cowl for passing through the cable connections between the tubular chassis and the attachment points. The circuit is energized by pressing on the mission selector push-button. The pilot controls the opening of the release unit via the release push-button.

Benefits
- Handle loads in hover light configuration, during acceleration and turns.
- Reduces the moment applied by the underslung load to the helicopter

Weight: 11.42 kg (80 lb)  -  Approvals: USA, EASA
Optional Equipment

Product Description

**AS350/H125**

AS350 B, B1, B2, B3, BA, C, D, DI

CAPABILITIES EXTENDED CARGO SWING - Part # 06-27009-00-Cl

This option provides the capacity of installing and controlling equipment, carried under a cargo sling or cargo swing. This equipment can be a second cargo hook on an extended sling or a fire fighting installation, such as Bambi Bucket. The installation provides; an additional push button on the cyclic pitch stick (1). When it is activated, the lower hook is opened, a cut-off connector (2), installed on the lower part of the body structure. It allows connecting the cable that controls the lower hook. When the installation is used to carry jettisonable load, the cable must be equipped with a release plug (reminded by a marking (3) besides the connector). The basic (upper) swing hook is still opened through its own push button on the cyclic pitch stick. The cargo swing emergency mechanical control system allows the pilot to open the upper hook by using the handle located behind the collective pitch lever.

**Weight:** Negligible  
**Approvals:** USA, EASA
Optional Equipment

Product Description

AS350/H125

AS350 B2, B3

ELECTRICAL CONTROLLER FOR 50AMP/LONLINE RELEASE/ CAROUSEL SYSTEMS

Part # 350-900564. Universal external 50Amp power supply designed to control longline remote hook release or carousel. It is a self contained unit with cyclic release and arm function. Compatible with following equipment (not supplied in kit): Bambi bucket (incl. USFS modification), carousel system, geophysics survey equipment, drip torch.

Benefits

- Self contained controller
- Cyclic activation - increase safety
- Separate ARM functions (exclusive)

Weight: 6.38 kg (14 lb) - Approvals: USA, Canada, EASA, Brazil, Mexico

Notes

- Kit supplied with loose mating connector to be wired by installer/operator
Optional Equipment

Product Description
**AS350/H125**
AS350 B, B1, B2, B3, BA, C, D, D1

**ELECTRICAL REAR VIEW MIRROR WITH DE-ICING SYSTEM - Part # 350AE280740271**

This installation enables the monitoring of sling work through the RH front lower window. The external electric mirror is controlled by a 4-position button installed on the pilot’s cyclic stick. Rear-view mirror with built-in electric motor installed on a stainless steel tube fitted with a strut.

**Benefits**
- Increased monitoring of carried load
- Ground or cabin adjustment of rear-view mirror positioning
- Anti-icing function for use in cold weather

**Weight:** 2.70 kg (5.95 lb)  
**Approvals:** USA, Canada, EASA
Optional Equipment

Product Description
AS350/H125
AS355
All models

DUAL CARGO MIRRORS - Part # 350-200264-03-RH

The Cargo Mirrors positions two mirrors directly outside the Pilot’s chin window for improved visibility when performing cargo hook operations. The mirrors can be installed on the left hand side, right hand side or both sides of the aircraft.

Benefits
• Eases maneuverability
• Lightweight

Weight: 1.72 kg (3.8 lb) per side - Approvals: USA, Canada, LBA (Germany), EASA countries, Brazil, Mexico

Notes
• The mirror is available as a replacement item P/N 350-200254.10
• Approved configurations: USA: LH or RH, Canada: LH and/or RH
Optional Equipment

Product Description
AS350/H125
All models

EXTERNAL MARKINGS – Part # AHC/78R-E-34-01

Replaces all external markings (stickers) mandatory by OEM standards. The External Markings changes and replaces the Fuel Quantity and Approved fuels placard and adds two new placards, Fuel Anti-icing Additive, gearbox oil level placards. It also eliminates some of the non required external placards which are not required by 14 CFR Part 27 airworthiness regulations.

Examples of available markings:

Specifications
• Direct replacement of original OEM markings
• Provides maintenance information to ground personnel

Weight: Negligible  -  Approvals: USA, Canada, Brazil
Optional Equipment

Product Description

AS350/H125
AS350 B, BA, B1, B2, B3, D

SX-16 NIGHTSUN SEARCHLIGHT INSTALLATION - Part # 350A82-1648-01

The Spectrolab SX-16 Nightsun® is a high-intensity (30–40 million candlepower) searchlight located at the junction with tailboom of the helicopter. The light and gimbal are mounted using a quick release assembly for fast, tool free installation and removal. This installation consists of:

- SX-16 searchlight and mount
- A gimbal assembly supporting the light
- A junction box located on the shelf in the aft baggage compartment
- A removable hand controller in the cockpit
- Internal and external wiring, circuit breakers and connectors
- Optional modified gimbal & Gen II control box for Spectrolink system

Specifications

- Vertical: 0° up to 47° down
- Horizontal: 30° right to 90° left
- Beam width (focus): 4° to 20°
- Lamp power output: 1600W/30 Million Cd
- Voltage: 28 VDC

**Weight:** 29.5 kg (64.62 lbs) - **Approvals:** USA
Optional Equipment

Product Description

AS350/H125
AS350 B, BA, B1, B2, B3, D

EXTERNAL PA SPEAKER – Part # 350A73-1720-01

The external public address (PA) system is designed for use on police or rescue missions, as well as for border patrol operations. This modification installs Power Sonix Inc. model PSAIR22 speaker provisions to support short-range broadcast capability. The PSAIR22 speaker assembly is mounted within the left hand intermediate chine panel and is oriented with the speaker bells directed outboard and downward. The basic aircraft’s lower intermediate cover and the demisting bleed air lines in the vicinity of the speakers are modified to accommodate the installation.

Specifications

- The speakers allow the pilot or observer to make announcements through the PA system via the audio box
- The system can also be used to broadcast other audio signatures, e.g. a siren
- The PA system is activated by a switch marked ‘PA’ located on the audio panel
- The siren is activated from the pilot’s cyclic switch
- Nearly no impact on aircraft performance

Weight: 9.07 kg (20.0 lb) - Approvals: USA
Optional Equipment

Product Description

AS350/H125
AS350 B, B1, B2, B3, D

NORTHERN AIRBORNE TECHNOLOGY 250 WATT PUBLIC ADDRESS  Part # 350A73-1724-01

This modification installs NAT speakers, amplifier and controller to support short-range broadcast capability. The speaker and amplifier assemblies are mounted within the left hand intermediate chine panel and the speaker assembly is oriented with the speaker bells directed outboard and downward. The PA system controller is (typically) mounted in the center pedestal area. The basic aircraft’s lower intermediate cover and the demisting bleed air lines in the vicinity of the speakers are modified to accommodate the installation.

Specifications

- The 250W PA system is a multi-speaker package mounted externally on the lower left belly panel
- The speakers allow the pilot or observer to make announcements through the PA system via the audio box
- The system can also be used to broadcast other audio signatures, e.g. a siren
- The best audio clarity in the PA mode is obtained by placing helicopter in a left hand orbit at approximately 500 ft AGL and at minimum power setting (65 kts)
- The PA system is activated by a switch marked ‘PA’ located on the audio panel
- The siren is activated from the pilot’s cyclic switch

Weight: 8.25 kg (18.19 lb)  -  Approvals: USA
### SETTLING PROTECTORS - Part #120-500214-01

Settling Protectors help guard against sinking into snow and soft ground. The settling protectors are comprised of LH and RH pads which attach to the aft end of the landing gear skid tubes.

### Benefits
- Maintains tail rotor ground clearance
- Easy installation and removal
- Lightweight
- Competitively priced

### Weight: 4.08 kg (9.0 lb) - Approvals: USA, Canada, Mexico

### Notes
- Available for the complete AS350 series and AS355 E, F/F1 and F2 models (USA)
- Available for the complete AS350 series and AS355 E, F/F1/F2, N, NP (Canada, Mexico)

LEFT HAND (LH) LITTER - Part # 350-200034-01

The LH Litter allows for transportation of an injured person on a portable litter. The litter is secured to the LH cabin floor, with the LH forward seat removed and the LH aft seats in the stowed position.

Benefits
- Fixed and detachable provisions can be sold separately
- Fleet interchangeable detachable provisions
- Quick mission changes possible
- Single seats can be stored in the side baggage compartment for remote area usage
- If Airbus Helicopters’ cargo pods are installed, removed single seat can be stored in one of the pods

Weight: 2.67 kg (5.9 lb) - Approvals: USA, Canada, Brazil, EASA, Mexico

Notes
- Also available as a RH litter (with a different P/N) for an aircraft equipped in LH pilot configuration
- AS355 information available upon request
- Check with Airbus Helicopters for compatibility with your aircraft

AIRFRAME HOURMETER – Part # 350A82-1631-01

The airframe hourmeter monitors and displays elapsed airborne time of the aircraft. This collective-activated hourmeter allows the operator to accurately record aircraft hours.

Benefits

- Indicates operating time in hours and tenths,
- Has a running indicator
- Activated upon take-off
- Improved maintenance efficiency
- Functions as a back-up to VEMD for flight hour recording purposes

Weight: Negligible - Approvals: USA, Canada, Brazil
Optional Equipment

G500H TXi GLASS COCKPIT INSTALLATION - Part #350A82-1662-01

This installation replaces the G500H with a Garmin G500H TXi PFD/MFD single 10.6” LCD touchscreen display, offering a space-saving glass cockpit solution, a L-3 ESI-500 Electronic Standby Indicator, a Thommen analog clock, and a True Blue USB charging port.

Benefits

- Single large 10.6” bright, crisp, flight display that is easy to read
- See clearly in dark VFR night, DVE or inadvertent IMC with HSVT™
- Helicopter Terrain Awareness Warning System (HTAWS) support
- Weather, traffic, and charting all in your primary field of view

Weight: 8.5 kg (18.75 lbs) - Approvals: USA
Optional Equipment

Product Description

AS350/H125
AS350 B2, B3

G500H GLASS COCKPIT INSTALLATION - Part # 350A82-1643-01/-02/-04/-05/-06/-07/-08/-09/-10/-11

Replaces analog instruments and installs G500H EFIS with options for single or dual transponder, radar altimeter and traffic system. AMS 07-4654 is the installation of the new avionics radio line (GTN650, GNC255A, GMA350H and GTX33H)

Benefits

- Dual 6.5” flight displays that are easy to read
- See clearly in dark VFR night, DVE or inadvertent IMC with HSVT™
- Helicopter Terrain Awareness Warning System (HTAWS) support
- Weather, traffic, and charting all in your primary field of view
- Video input for FLIR or other camera display
- Increased safety

Weight: 7.25 kg (16 lbs) - Approvals: USA, Canada
Optional Equipment

Product Description
AS350/H125
AS350 B2, B3

ESI-2000 ELECTRONIC STANDBY INDICATOR (TRILOGY) - Part # 350A82-1645-01

Replaces analog instruments and installs G500H EFIS with options for single or dual transponder, radar altimeter and traffic system. AMS 07-4654 is the installation of the new avionics radio line (GTN650, GNC255A, GMA350H and GTX33H)

Benefits
- Combines attitude, altitude, airspeed, slip/skid and optional heading data into a single digital display
- Logically grouped flight data eliminates multiple instruments, making the transition to standby easier
- Internal battery (ESI-2000 model) provides flight data for a minimum of one hour after power loss
- Single instrument reduces weight and scan times vs. reading multiple instruments
- Solid-state design offers increased reliability compared to electro-mechanical instruments

Weight: 1.01 kg (2.22 lb) - Approvals: USA, Canada

Notes
- Trilogy™ Electronic Standby Instrument (ESI) is required for G500H TCCA STC
- Check with Airbus Helicopters for compatibility with your aircraft

TRAFFIC ADVISORY SYSTEM (TAS) 615 INSTALLATION - Part # 350A82-1649-01

Avidyne’s TAS615 system detects and actively interrogates other aircraft transponders within range, displays the surrounding traffic on a host of compatible display systems, and provides audible and visual alerts in the event of a potential traffic conflict. The system also provides real-time traffic monitoring and advisories, it is not radar-coverage limited, and operates independent of ground-based systems.

Benefits
- Three levels of alert - Other Traffic (OT), Proximity Alert (PA) and Traffic Alert (TA)
- Provide a full 30-second decision time at a closure rate of up to 1200 knots
- Added safety in all flight conditions
- Provides real time traffic information

Weight: 4.98 kg (10.98 lb)  -  Approvals: USA

Notes
- Altitude information provided by the TAS615 is advisory only and is not to be used for dispatching purposes.
- It does not relieve the pilot in command of this responsibility.
Optional Equipment

AS350/H125
AS350 B2, B3

BMS VIDEO DOWNLINK SYSTEM INSTALLATION - Part # 350A82-1647-03

The Airborne Downlink system is a single box solution containing everything needed for high-quality, reliable transmission. This includes the video encoder, modulator, up-converter and high-power amplifier. It also includes a dependable low cost antenna mounted on the cabin roof and employs an omnidirectional antenna that provides 360° of azimuth coverage. The new Cockpit Downlink Control Panel is designed to give the aircraft operator full control of any BMS digital microwave system.

Features

- A signal power amplifier mounted in the right baggage compartment
- Primary aerial control panel mounted in the console
- Omni antenna mounted on the right skid
- Dedicated GPS antenna mounted on the cabin roof

Benefits

- Low delay time
- Digital signal resistant to multipath degradation

Weight: 3.73 kg (8.25 lb) - Approvals: USA
Optional Equipment

Product Description

AS350/H125
AS350 B2, B3

MULTI-BLOC CENTER CONSOLE INSTALLATION - Part # 350A73-2023-01

This modification replaces the original center console with one which is slightly taller, allowing for the installation of deeper avionics units. The switches and annunciators from the original center console are transferred to the new console.

Benefits
- Allows for the installation of Garmin GTN750 displays

Weight: Negligible - Approvals: USA
CABLE CUTTER INSTALLATION - Part # 350-252004

The Cable Cutter Installation offers a measure of protection against impacting horizontally strung cables. The cable-cutters are installed on the lower and upper canopy. This installation is highly recommended by Airbus Helicopters for the improved safety of passengers and crew.

Benefits
- Protection against cable strike
- Improved safety for pilot and passengers
- No additional maintenance
- Lightweight installation

Weight: 6.64 kg (14.6 lb) - Approvals: USA, Canada, Brazil, Mexico

Notes
- Kit compatible only with airframe post factory modifications OP 1946 and OP 1947
Optional Equipment

---

**CARGO PODS (“SQUIRREL CHEEKS”)**

The Cargo Pods increase the volume of both the left hand (LH) and right hand (RH) cargo compartments. They can be installed individually or in pairs.

The composite material pod has a hinged door which opens widely for easy access to the storage area and is held open by a gas strut. The door fastens securely for flight with three positive latches.

The installation also includes a door open warning annunciator. The upper portion of the cargo pod surface includes an excellent standing area for maintenance activities. The fuel filler and EPU access are unaffected. The cargo pods are ideal for utility missions, tourism and corporate passenger transport.

---

**Benefits**

- Increases the cargo load capacity by 70% over the standard AS350 cargo compartment
- Increases cargo volume capacity by 90% over the standard AS350 cargo compartment
- Eases access
- Platform for maintenance
- Aerodynamic design
- Dual or single installation

AIRFRAME FUEL FILTER - Part # 350-600004

The Airframe Fuel Filter removes foreign particles from the fuel, including ice particles which allows sub zero operation without the use of anti-ice fuel additives.

Benefits
- Removes foreign particles from fuel
- Allows helicopter to operate at below freezing temperatures without anti-ice additives
- Impending bypass indicator in cockpit

Weight: 2.37 kg (5.2 lb) - Approvals: USA, Canada, Germany, Brazil, Mexico

Notes
- Container must be emptied manually
- Fuel additives are required for operation below 0°C when ferry tanks are used

CARGO TIE DOWN RINGS IN AFT CABIN FLOOR - Part # 350A82-1094-02

The Six heavy-duty cargo tie-down ring system consists of reinforced attachment points on the aircraft’s cabin floor. This system allows heavy objects to be secured in the cabin, and can also be used for rappelling from the helicopter, without preventing the later re-installation of rear seats. The system’s flexibility makes it extremely popular with utility and parapublic operators.

Benefits
- Enhanced safety through the secure transportation of loads and equipment inside the helicopter
- Allows internal or external loads to be safely secured
- Enhanced aircraft mission versatility
- Each tie down point is rated to restrain 62.5 lb of cargo for internal loads and 250 lb for external loads
- The tie-down fittings can be mounted on the four floor attachment rails which are fitted as standard

Weight: Negligible - Approvals: USA

AIRCRAFT SEAT COVERS

The Aircraft Seat Covers are made with highly wear-resistant aircraft fabric or leather. Approved fabric is available in two patterns and three colors (black, grey and blue). Approved leather is available in two colors (grey and blue). The covers can easily fit onto the existing seat foams. Replacement foams can be ordered separately to provide a replacement cushion.

Benefits

- Enhanced comfort and design
- Easy to install
- Made with flame resistant materials, approved by Transport Canada

**BACK SEAT DOCUMENT HOLDERS - Part # 350-701074**

The Back Seat Document Holders provide discreet leather pockets mounted on the rear of the energy absorbing seats. Due to its elastic design the document holders are not bulky, however can easily accommodate larger documents, such as Flight Manuals, or store up to approx. 3.2 kg. Available in a highly robust leather, dyed black, grey or blue to match the approved leather seat covers.

![Image of Back Seat Document Holders]

**Benefits**
- Provides space for stowing documents and small personal items for pilots and crew
- Elastic design prevents holder contents from moving during flight, thus enhancing safety
- Light weight and compact
- Easy to install

**Weight:** 1.0 kg (2.2 lb)  
**Approvals:** USA, Canada, EASA, Mexico, Brazil

BATTERY RELOCATION KIT

The Battery Relocation Kit provides provisions to install a high capacity lead acid or nickel cadmium battery in the tail boom removing the standard aircraft battery located in the right hand (RH) cargo compartment. It reduces the need for aft aircraft ballast and increases the usable space in the RH cargo compartment. The battery is mounted on a removable tray in the left hand (LH) side of the tail boom. The battery relocation kit is ideal for balancing aircraft equipped with heavily loaded instrument panels.

Benefits

- Increases RH cargo capacity
- Reduces the need for tail boom ballast
- The battery can be quickly disconnected and can be removed while wearing winter gloves

**7 PLACE INTERIOR**

The 7 Place Interior consists of a composite-structure 2 Place Forward Passenger Seat on the right-hand side of the cockpit as well as, the Left-hand Pilot Installation. The seat is installed on fixed rails on the cabin floor and is removable by use of quick-release fasteners. A four point seatbelt and shoulder harness is provided for each front occupant of the seating arrangement. The pilot-in-command position is moved from the right to the left side, along with all associated flight controls and other cockpit controls and instrumentation. Provisions for optional dual pilot controls are included in this installation. Battery Relocation is highly recommended for the 7 Place Interior.

**Benefits**
- Increased passenger capacity
- Increased visibility of load during cargo sling operations
- Improved cabin space for additional options
### 7 PLACE INTERIOR - CONTINUED

### Notes
- Requires the installation of the Left-hand Pilot (I.A.W. TCCA SH96-32).
- The dual bench rails are compatible with the extended EA seat rails
- Seat covers are not included and are to be provided and certified by the installer
- The front bench seat is the same width as the rear bench seats (16").
LEFT-HAND PILOT CONFIGURATION

The pilot-in-command position is moved from the right to the left hand side, along with all associated flight controls and additional cockpit controls and instrumentation. The Instrument Panel is available in three different sizes including; tour, standard and extended.

Benefits

- Increased visibility of load during cargo sling operations
- Improved cabin space for additional options
- Allows for the use of dual controls
### Left-Hand Pilot Configuration - Continued

|                  | Retrofit can be performed at Airbus Helicopters facility or maintenance shop |

**Notes**

- Relocating the aircraft battery to the tailboom (Battery Relocation Kit) is highly recommended.
- The space remaining in the center of the cockpit floor after the engine control quadrant is moved to the left allows for a 7 Place Interior Configuration.
- Left-hand Pilot lighting modification and configuration to be addressed by installer.
- Lighting solution included for aircraft with multi-bloc console.

**HIGH VISIBILITY DOORS**

The High Visibility Doors provide pilots and passengers with an increased viewing field through the extra large windows. The fully composite doorframe replaces the standard door(s) and can be installed individually or in any combination, including all four doors.

The high visibility doors are ideal for law enforcement, tourism and utility missions.

**Benefits**

- Increases visibility for pilots and passengers
- Increases passenger comfort
- No change to operational limitations
- Same safety features as a standard door (latching, locking and emergency egress)
- No obstruction for camera, video equipment or goggles

FORWARD SHORT HIGH-VISIBILITY DOORS

The short version of the high visibility door is compatible with the sliding door and provides a full height continuous window option for aircraft equipped with rear sliding doors. The doors can be installed on one or both sides of the aircraft.

Benefits

- Increases visibility for pilots and passengers
- No visual interference with binoculars or goggles
- Increases passenger comfort
- No performance restriction
- Same safety features as a standard door (latching, locking and emergency egress)

### Notes
- Finished in primer: must be painted after installation
- For use with sliding rear doors only (not compatible with rear hinged doors).
ENLARGED VERTICAL REFERENCE WINDOW - Part # 350-201154

The enlarged vertical reference window is the largest vertical reference window available on the market for AS350/355 aircraft. For long lining operations the larger window permits you to see loads closer to the aircraft allowing for operations with shorter lines, resulting in enhanced operating versatility and safety. Increases visibility for long lining.

Benefits
- Airbus Helicopters extended forward composite belly panel totally incorporates the window.
- The drop down of the belly panels for maintenance access is unaffected, no screws, only the quick release latches.
- Airbus Helicopters offers the largest floor window on the market. Belly panel window size is 0.23 square meters.
- Intermediate composite belly panels includes relocation of landing light.
- Customer can keep the original panels.

Weight: 2.8 kg (6.2 lb) - Approvals: USA, Canada

Notes
- Rework of floor and composite belly panels required
- Not compatible with the RH Sliding Door
**COWLING MAINTENANCE STEPS** - Part # 350-200094

The Cowling Maintenance Steps improve access to the main rotor head for routine maintenance and inspection. Large enough for winter boots, the steps are located on both sides of the aircraft.

### Benefits
- Improved access to the main rotor head for maintenance and inspection.

**Weight:** Negligible  
**Approvals:** USA, Canada
Optional Equipment

Product Description
AS350/H125
AS355
All models

**RAIL STEPS - Part # 350-500194**

The Rail Steps installation introduces an elevated step to each side of the landing gear, providing easier entry and exit for crew and passengers. It also provides maintenance staff with improved access to the transmission deck for daily checks and maintenance.

**Benefits**
- Provides easier entry and exit for crew and passengers
- Provides easier access to transmission deck for maintenance

**Weight:** 7.7 kg (17.0 lb) with LH & RH installed  -  **Approvals:** USA, Canada
Optional Equipment

Product Description

AS350/H125
AS355
All models

REAR MAINTENANCE STEPS - Part # 350-500604

The Rear Maintenance Steps improve access to the engine and transmission decks for routine maintenance and inspection. They are mounted on the landing gear aft cross tube and include an anti-slip surface.

Benefits

- Large contact surface with anti-slip finish for safety
- Improved access to engine and transmission
- Kit includes both left and right step assembly

Weight: 2.2 kg (4.9 lb) LH & RH installed

Approvals: USA, Canada, EASA, Mexico, Brazil
BELLY-MOUNTED ANTI-COLLISION LIGHT (WHITE) - Part # #350A82-1576-11

This newest installation of a strobe anti-collision light installation, and/or supplemental strobe light, enhances collision avoidance by making the aircraft more visible to others, thereby improving flight safety. This new installation of the LED anti-collision strobe light is set lower on the aircraft’s belly than the previous version, to enhance visibility when facing the front of the aircraft. It is placed just aft of the rear landing gear cross tube.

Benefits

- Improved aircraft visibility to others, improving flight safety
- Offers increased positional awareness for nearby traffic

Weight: 0.4 kg (0.88 lb) - Approvals: USA, Canada
Optional Equipment

Product Description

**BLADE TIE-DOWN KIT** - Part # 350-700414

The Blade Tie-Down Kit prevents the blades from flapping in windy conditions while the helicopter is parked on the ground.

**Benefits**

- Prevents blade movement and main rotor head damage
- Easy and efficient one-person installation, no additional equipment required
- Compact and light ground support equipment for on-board storage

**Weight:** 0.14 kg (0.3 lb) fixed provision  -  **Approvals:** USA, Canada, EASA, Brazil, Mexico

**Notes**

- For winds up to 40 knots.

**EXTERNAL MARKINGS** - Part #AHC/78R-E-34-04

Replaces all external markings (stickers) mandatory by OEM standards. The External Markings changes and replaces the Fuel Quantity and Approved fuels placard and adds two new placards, Fuel Anti-icing Additive, Fenestron gearbox oil level placards. It also eliminates some of the non required external placards which are not required by 14 CFR Part 27 airworthiness regulations.

Examples of markings available:

![Fuel Placard](image)

**Benefits**

- Direct replacement of original OEM markings
- Provides maintenance information to ground personnel

**Weight:** Negligible  
**Approvals:** USA, Canada, Brazil

**Notes**

- For winds up to 40 knots.
**ADJUSTABLE GLARE SHIELD** - Part # 130-885114

The Adjustable Glare Shield modification kit allows tilting of the glare shield to adjust to the pilots height.

**Benefits**
- Improved comfort for tall pilots
- Easy to adjust by hand, while on the round to upper or low position, depending on the pilot’s height

**Weight:** 1.09 kg (2.4 lb)  -  **Approvals:** USA, Canada, EASA

**Notes**
- Not compatible with non OEM air-conditioning.

Product Description

H130 T2

G500H GLASS COCKPIT INSTALLATION

Replaces analog instruments and installs G500H EFIS with options for single or dual transponder, radar altimeter and traffic system. AMS 07-4654 is the installation of the new avionics radio line (GTN650, GNC255A, GMA350H and GTX33H)

Specifications

• Dual 6.5” flight displays that are easy to read
• See clearly in dark VFR night, DVE or inadvertent IMC with HSVT™
• Helicopter Terrain Awareness Warning System (HTAWS) support
• Weather, traffic, and charting all in your primary field of view
• Video input for FLIR or other camera display

Benefits

• Enhanced situational awareness
• Integrated flight and systems displays
• Enhanced avionics and cockpit flexibility
• Increased safety

ESI-2000 ELECTRONIC STANDBY INDICATOR (TRILOGY) INSTALLATION

Part # 350A82-1645-01 - Replaces analog instruments and installs G500H EFIS with options for single or dual transponder, radar altimeter and traffic system. AMS 07-4654 is the installation of the new avionics radio line (GTN650, GNC255A, GMA350H and GTX33H)

Benefits

- Combines attitude, altitude, airspeed, slip/skid and optional heading data into a single digital display
- Logically grouped flight data eliminates multiple instruments, making the transition to standby easier
- Internal battery (ESI-2000 model) provides flight data for a minimum of one hour after power loss
- Single instrument reduces weight and scan times vs. reading multiple instruments
- Solid-state design offers increased reliability compared to electro-mechanical instruments

Weight: 1.01 kg (2.22 lb) - Approvals: USA, Canada

Notes

- Aircraft equipped with the ESI-2000 is limited to Day/Night VFR operations only.
Optional Equipment

Product Description

**H130**

**B4, T2**

**PUREAIR SYSTEM - Part # PA100**

A totally redesigned, reengineered and retested engine air protection system that goes above and beyond its predecessor. The PA100 PUREair System increases operational availability and aircraft performance, while reducing overall maintenance and operational costs. Major improvements on the redesigned system:

- Improved dust separation efficiency for H130
- New panel location, latest generation of vortex tubes and revised tube layout
- Reduced bleed air
- Optimized ejector design and no P2 bleed air valve
- Filter efficient at all times
- Improved FOD protection
- New downstream FOD screen sitting on engine inlet
- FOD protection even when cowl is open
- Easier to install and maintain
- Simplified installation (no P2 air valve)
- No barrier filters to clean

**Benefits**

- **Fit and Forget:** Self-cleaning system is virtually maintenance free
- Better protection in all weather conditions
- Reduction of engine erosion damage
- Environmentally friendly solution: no need for chemical cleaning and filter replacement
- Increased protection against hot gas ingestion

**Weight:** 27.66 kg (61 lb) - **Approvals:** USA, Canada, Brazil, EASA, Japan

B4

AIRFRAME FUEL FILTER - Part # 130-600004

The Airframe Fuel Filter removes foreign particles from the fuel, including ice particles which allows for sub zero operation without the need for anti-ice fuel additives. Only for B4.

Benefits
- Removes foreign particles from fuel
- Allows helicopter to operate at below freezing temperatures without anti-ice additives

Weight: 4.1 kg (9.0 lb)  -  Approvals:  USA, Canada, Brazil, Mexico

Notes
- Container must be emptied manually
BACK SEAT DOCUMENT HOLDERS - Part # 130-701074

The Back Seat Document Holders provide discreet leather pockets mounted on the rear of the energy absorbing seats. Due to its elastic design the Document Holders are not bulky, however can easily accommodate larger documents, such as Flight Manuals, or store up to approx. 3.2 kg. Available in a highly robust leather, dyed black, grey or blue to match the approved leather seat covers.

Benefits
• Provides space for stowing documents and small personal items for pilots and crew
• Light weight and compact
• Elastic design prevents holder contents from moving during flight, thus enhancing safety
• Easy to install

Weight: 1.0 kg (2.2 lb) - Approvals: Canada

Notes
• Only available on energy absorbing seats.
• Can only be installed when fire extinguisher is relocated onto the floor (with a strap).
Optional Equipment

Product Description

H130
B4, T2

CARGO PODS (“SQUIRREL CHEEKS”)

The Cargo Pods increase the volume of both the left hand (LH) and right hand (RH) cargo compartments. They must be installed in pairs. The composite pod has a hinged door which opens widely for easy access and is held open by a gas strut. The door fastens securely for flight with three positive latches.

The pod also includes a door open warning annunciator. The upper portion of the cargo pod surface includes a maintenance platform. The fuel filler and EPU access is unaffected. The cargo pods are ideal for utility missions, tourism and corporate passenger transport.

Benefits

- Increases the cargo load capacity by 35% over the standard EC130 cargo compartment
- Eases access to the engine deck and provides a good maintenance platform
- Aerodynamic design

RIGHT HAND LITTER KIT - Part # 130-200034

The Litter Kit allows the H130 helicopter to transport one medical patient on a secured stretcher. The installation is located on the right hand side of the cabin floor. The fixed provisions are compatible with both the 7 and 8 place interiors. Only for B4.

Benefits

- Quick installation for medical evacuation
- Increases multipurpose platform role

Weight: 29.3 kg (64.6 lb) - Approvals: USA, Canada

Notes

- Patient orientation is “head forward”
- Not compatible with dual controls
Optional Equipment

Product Description

H130
B4

COWLING MAINTENANCE STEPS - Part # 130-200094

The Cowling Maintenance Steps improve access to the rotor head area for routine maintenance and inspection. Large enough for winter boots, the steps are located on both sides of the aircraft immediately above the cargo compartments.

Benefits

- Improved access to the main rotor head area for maintenance and inspection

Weight: Negligible - Approvals: USA, Canada

Notes

- Must be installed as a pair
LEAD ACID BATTERY INSTALLATION - Part # 130A82-0004

The battery installation consists of a Concorde Lead Acid battery RG-350. The Concorde lead acid battery is a recombinant gas lead acid battery that replaces the standard aircraft Nickel Cadmium battery installed in the forward tray of the tail boom using the existing mechanical mounting hardware.

Benefits
- Environmentally responsible (no HAZMAT)
- Maintenance-free, non-spillable
- Very low impedance design

Weight: 18.6 kg (41 lb) - Approvals: USA
Optional Equipment

ELECTRICAL CONTROLLER FOR 50AMP/LONGLINE RELEASE SYSTEM

Universal external 50Amp power supply designed to control longline remote hook release or carousel. It is a self contained unit with cyclic release and arm function. Compatible with following equipment (not supplied by Airbus Helicopters): bambi bucket (incl. USFS modification), carousel system, geophysics survey equipment, drip torch.

Benefits

- Self contained controller
- Cyclic activation - increase safety
- Separate ARM functions (exclusive)

**AIRCRAFT SEAT COVERS - Part # 30-701904-01**

The H130 Aircraft Seat Covers are made with highly wear-resistant aircraft fabric or leather. The covers can easily fit onto the existing seat foams. Replacement foams can be ordered separately to provide a replacement cushion. Approved fabric is available in two patterns and three colors (black, grey and blue). Approved leather is available in two colors (grey and blue).

**Benefits**
- Enhanced comfort and design
- Easy to install
- Made with flame resistant materials, approved by Transport Canada

**Weight:** 1.0 - 1.5 kg (2.2 lb - 3.3 lb) depending on material

**Approvals:** Canada

**Notes**
- Leather is available in flat or perforated
Optional Equipment

Product Description

B4, T2

AIRCRAFT FLOOR COVERS (AERMAT FLOORING) - Part # 130-701814-01

The Aircraft Floor Cover is a durable utility vinyl floor mat made to help protect the entire cabin floor. Available in black, grey and blue.

Benefits

- Protects the cabin floor
- Provides enhanced comfort through insulation
- Long-lasting
- Reinforced with minimal shrinkage
- Wear-resistant
- Custom fit

Weight: 11.3 kg (24.9 lb) - Approvals: Canada
DUAL CARGO MIRRORS - Part # 130-201414

The Cargo Mirrors positions two mirrors directly outside the Pilot’s chin window for improved visibility when performing cargo hook operations. The mirrors is installed on the left hand side of the aircraft.

**Benefits**
- Eases maneuverability
- Lightweight

**Weight:** 1.72 kg (3.8 lb)  -  **Approvals:** USA, Canada, EASA, Mexico, Brazil

**Notes**
- The mirror is only available as a left-hand configuration
- Replacement of mirror P/N 350-200254.10
- Replacement of mirrors + hardware P/N 130-201434
Optional Equipment

Product Description

H130
B4, T2

ELECTRICAL REAR VIEW MIRROR WITH DE-ICING SYSTEM - Part # EC130-25-50-02

This installation enables the monitoring of sling work through the LH front lower window. The external electric mirror is controlled by a 4-position button installed on the pilot’s cyclic stick. Rear-view mirror with built-in electric motor installed on a stainless steel tube fitted with a strut.

Benefits

- Increased monitoring of carried load
- Ground or cabin adjustment of rear-view mirror positioning
- Anti-icing function for use in cold weather

Weight: 3.70 kg (8.15 lb) - Approvals: USA, Canada, EASA
Optional Equipment

Product Description

H130
B4

STAINLESS STEEL HINGES TRANSMISSION & ENGINE COWLING - Part # 130A82-0006-02

These stainless steel hinges replace the factory aluminum hinges for the transmission cowling and engine cowlings.

Benefits

- Less rust formation and corrosion in highly-corrosive environments

Weight: Negligible - Approvals: USA, Canada
GENESYS HELISAS AUTOPILOT - Part # SR02345LA

The Genesys Helisas Autopilot is a helicopter autopilot for light and medium rotorcraft and helps with dramatically reducing the pilot’s workload while providing precise control during all modes of flight, regardless of wind conditions or shifts in weight. The HeliSAS stability augmentation system is designed to be engaged at all times. “SAS on” before takeoff and “SAS off” after landing to provide unmatched stability and ease of handling, and reduce the pilot’s workload to make it easier to adjust radios, set destinations, etc.

Benefits
- Dramatic reduction in pilot workload
- Course intercept capability, HDG to NAV
- A two-axis autopilot providing both lateral and vertical functions
- Auto-recover to a neutral attitude in situations where the pilot may lose visual reference (SAS)

Weight: 6.8 kg (15 lb)  -  Approvals: USA, Canada, EASA, Brazil, Mexico
CARGO SWING (1,500KG - 3,307 LB) - Part # 06-27048-00-FP

The slang-type cargo hook system allows lifting and transporting external loads of up to 1,500 kg (3,307 lb). The system consists of fixed and detachable parts for maximum mission flexibility. Load indicator installed on the vertical mount of the pilot’s canopy.

Benefits
- Handle loads in hover light configuration, during acceleration and turns.
- Reduces the moment applied by the underslung load to the helicopter

**Weight:** 8.25 kg (18.07 lb) - **Approvals:** USA, EASA
CABLE CUTTER INSTALLATION - Commercial Ref. # E8541-000-10

The cable cutter system is designed to provide a measure of protection against horizontally strung wire impact between cockpit roof and main rotor blades and between bottom shell and skid tubes. The protection can be achieved by deflecting or cutting the wires. Cutting the wires is done by rigidly mounted converging blades using the kinetic energy of the flying helicopter. Deflecting the wires is done by skid gear deflectors and the windshield wiper deflector.

The cable cutter system consists of:

**Fixed provisions:**
- Reinforcement of the cabin framework
- Attachment points for the detachable parts (cutters, struts and deflectors)
- Windshield wiper deflector (if installed)

**Detachable parts:**
- Upper cutter with struts on cabin roof
- Lower cutter with struts on bottom shell
- Skid deflectors

**Weight:** 6.64 kg (14.6 lb)

**Approvals:** USA, Canada, EASA
Optional Equipment

REMOVABLE PINS FOR HINGED DOOR - Part # 135-201014

Designed to easily remove crew hinged doors without any tools. This new design uses a pip-pin with a double locking design for safety. Great in remote operations, when you need to fly in with the doors on and remove them at the construction site. No need to bring a mechanic.

Benefits
- Easy and quick removal of doors
- Self guided washer clip design
- Quick release pip pins
- Tool free removal

Weight: Negligible - Approvals: Canada
Optional Equipment

LEAD ACID BATTERY INSTALLATION - Part # 135A73-0019-04

Concorde RG-390E or RG-380E/44 Acid Battery. The Concorde lead acid battery is a recombinant gas lead acid battery that replaces the standard aircraft Nickel Cadmium (NiCad) battery located behind the right hand aft engine cowl and uses the existing battery securing provisions.

Benefits

- Environmentally responsible (no HAZMAT)
- Maintenance-free, non-spillable
- Very low impedance design

Weight: 18.6 kg (41 lb) - Approvals: USA, Canada
Optional Equipment

GNS-530(A)W GPS/WAAS INSTALLATION - Part #135A73-0066-01

IFR Single or Dual Pilot WAAS GPS installation to enable GPS precision approaches using the Garmin GNS-530(A)W GPS/WAAS receiver consisting of the following changes: Modified GNS530W software enabling the GLS mode (GLS = GPS Landing System), which is an ILS-Look-Alike signal based on angular deviation. Modified Thales SMD45 software, enabling the indication of the GLS mode, the available Level of Service, the distance and label of next waypoint, and the autopilot modes. A relay that switches the input to the FCDM between VOR/ILS and GLS based upon the selection of the GNS530(A)W CDI key (VLOC or GPS). The FCDM and the autopilot module were unmodified.

Benefits
- Accurate position solution, typically one to two meters
- Perform precision approaches down to a 200-foot decision height with a one-half mile visibility
- WAAS accuracy is a significant improvement over the typical accuracy obtained using GPS alone

Weight: 6.6 kg (14.55 lb) - Approvals: USA, EASA

Notes
- Only applicable for aircraft with SMD45, not SMD68
Optional Equipment

LEAD ACID BATTERY INSTALLATION - Part #: 145A73-0001-03

The Concorde lead-acid battery provides a “low-maintenance” alternative to the standard ni-cad battery. This installation consists of a Concorde RG380E/44 recombinant gas lead-acid battery and, a temperature sensor bypass to ensure the aircraft charging system provides the correct charging voltage to the battery.

Benefits
- Reduced maintenance requirements
- Increased battery performance and safety

Weight: 41.73 kg (92 lb) - Approvals: USA, Canada
Optional Equipment

Product Description

EC145/H145
C2

GNS-430W GPS/WAAS INSTALLATION - Part #145A73-0054-02

IFR Single or Dual Pilot WAAS GPS installation to enable GPS precision approaches using the GNS 430W GPS/WAAS receiver installation allows LPV and L/VNAV coupled approach capability in the BK117C-2 helicopter. The system installation includes the following: Dual Garmin GNS 430W GPS/WAAS receivers with modified software enabling the GLS mode (GLS = GPS Landing System), which is an ILS-Look-Alike signal. A NMS1/NMS2 switch to select the GPS NAV unit to be displayed on ND #1 and #2 for navigation. Approach mode annunciation repeater located below the VEMD. Thales SMD45 displays modified to indicate the GLS mode, the available LOS, the distance and label of next waypoint, and the autopilot modes.

Benefits

- Accurate position solution, typically one to two meters
- Perform precision approaches down to a 200-foot decision height with a one-half mile visibility
- WAAS accuracy is a significant improvement over the typical accuracy obtained using GPS alone

Weight: 3.8 kg (8.38 lb) - Approvals: USA, EASA

Notes

- Only applicable for aircraft with SMD45, not SMD68
**HEALTH AND USAGE MONITORING SYSTEM (HUMS) - Part # SR04358CH**

The overall goal of Health and Usage Monitoring System (HUMS) is to provide information pertaining to the helicopter usage and the condition of the helicopter dynamic system, to support customers in their maintenance program application. In this way the HUMS helps to increase the helicopter readiness and availability, decreases operation and maintenance costs, and enhances the flight safety.

**Benefits**

- Rotor track & balance alleviation, main rotor & tail rotor
- Health prognosis
- Reduction of maintenance after exceedance
- Flight Data Monitoring

**Weight:** 7.7 kg (17 lb)  
**Approvals:** USA
HEALTH AND USAGE MONITORING SYSTEM (HUMS) - CONTINUED

Legacy HUMS was designed for large military and Oil & Gas operating heavy helicopters. In that context, HUMS was mandatory and cost was a secondary matter. Airbus Helicopters, Inc. proposes a new generation of HUMS tailored for light aircraft operations. The system is light, user-friendly, integrated to AHI S&S (web-portal) and optimized to deliver reduction in flight hours and man hours maintenance. AHI HUMS can be tailored to alleviate specific maintenance operations, such as vibration checks. HUMS modules will deliver operational benefits. Our HUMS relies on digital smart sensor and a distributed architecture.

We identified four main categories of savings:

1. Rotor track & balance alleviation, main rotor & tail rotor: no need of additional equipment, settings available after each flight, number of flight tests reduced, time for RTB on-ground operations reduced.
2. Health prognosis
3. Reduction of maintenance after exceedance
4. Flight Data Monitoring

[Diagram of HUMS system]
### QUICK RELEASE UTILITY BASKET - Part # D117-1044-011

The Quick Release Utility Basket features a quick release mounting system that enables the operator to remove and install the basket quickly, without tools. The basket is constructed of corrosion-resistant stainless steel, coated with a high-gloss, scratch-resistant white finish. Enhanced safety with a simple self-locking handle that assures lid closure and secures cargo during flight. Ease of use with gas spring to assist when opening and closing the lid. Support beams are also equipped with quick release hardware for tool-less removal of 97% of kit weight in minutes.

**Benefits**
- Basket can be installed/removed by 1 person in less than 1 minute without the use of tools
- 97% of weight can be removed in minutes
- Can carry up to 200 lbs of cargo externally
- Corrosion-resistant stainless steel construction

**Weight:** 60.8 k (134 lb)  -  **Approvals:** USA, EASA
