

Pilot Training

H135 Recurrent Training Course

3 Days

Ground School 13 Hours (3 Days)

Sim 0 Hours

Flight 2 Hours per Student

SCOPE:

This course will provide a complete Recurrency Ground School of the H135 helicopter. Classroom instruction, combined with handouts, will provide information for a thorough review and overall understanding of the aircraft. This review will cover normal procedures, aircraft limitations, and emergency procedures.

OBJECTIVE:

To provide a review of the fundamental knowledge of the aircraft and the aircraft systems necessary to conduct safe pre-flight, flight, and post-flight operations in the H135 helicopter. Upon successful completion of this course the student should be able to conduct operations, within the limits of the flight manual, safely and efficiently.

COURSE PREREQUISITES:

Acceptance into this course is based upon these requirements:

- A current FAA issued Helicopter Pilot Certificate
- Valid Medical Certificate
- Multi-Engine Experience
- Current Helicopter Experience
- Successful Completion of the H135 Transition Course
- Attended a H135 Course within past 5 years

In special circumstances any of the above requirements may be waived with the approval of Airbus Helicopters, Inc.'s Chief Flight Instructor.

NOTICES:

Airbus Helicopters, Inc. reserves the right to notify customer of the occurrence of any force majeure condition that, in its sole discretion, is the cause of excusable delay. In the event of a force majeure condition, the services and/or classes will be extended or, if required, rescheduled for the first available opening. Airbus Helicopters, Inc. will not be liable for any costs, claims, or damages to customer or its employees arising from delays or interruptions caused by any force majeure condition.

The stated duration of the course is based on two student pilots per course. Additional student pilots may change the duration of the flight portion of the course. Airbus Helicopters Inc. instructor pilots fly a maximum of 4.5 hours per day.

Ground School

13 Hours

Day 1

Introduction and General Overview

0.5 hours

SCOPE: This block of instruction will cover registration and orientation to the course, an explanation of the course outline, Airbus Training School Operations and a general overview of the helicopter. The general overview will include the main characteristics, description, main dimensions, airframe reference points, the engine, the main components and systems, the cockpit layout of the helicopter, including, malfunctions, and the helicopter operating publications

Lifting System

1.0 Hours

SCOPE: This block of instruction will cover the functions of the main rotor drive system, the main gearbox and its components and lubrication system to include the indicating system, air circulation, main gear box caution / warning lights, the rotor brake components and operation. The main rotor, the main rotor blades, the main rotor control assembly, the rotor speed monitoring and indicating system, the aural warnings and the main rotor and main transmission limitations.

Fuselage

0.5 Hours

SCOPE: This block of instruction will cover the basic structure of the helicopter including the main cabin, the floor structure, aft structure, doors, windows, cowlings, and firewalls.

Tail Unit

1.0 Hours

SCOPE: This block of instruction will cover the tail boom, tail rotor drive system, the tail rotor drive shaft, the tail gearbox, the Fenestron, and tail rotor control failure.

Flight Control

1.5 Hours

SCOPE: This block of instruction will cover the cyclic and collective controls and the tail rotor flight controls, to include the hydraulic system and SAS systems and associated normal and emergencies procedures.

Day 1 continued

Landing Gear

0.5 Hours

SCOPE: This block of instruction will cover the landing gear components and their functions, the mounting and characteristics the cross tubes and skids.

Day 2

Power Plant

3.0 Hours

SCOPE: This block of instruction will cover the aircraft fuel system components and operation, the Turbomeca Arrius or P&W power plant, engine mounting, engine operation, fuel filters, and the fuel injection system, the engine control switches, the emergency fuel shut-off, the engine monitoring system, the engine lubrication system and oil cooling, the lubrication indicating system, and the engine compartment fire detection system.

Electrical System

1.0 Hours

SCOPE: This block of instruction will cover the direct current power sources, power system components and their functions, layout of the power system components, power distribution, external power units, and the systems associated malfunctions and failures as well as caution / warning lights.

Helionix

2.0 Hours

SCOPE: This block of instruction will cover introduction and overview of the Flight Control Display System, First Limitation Indications for AEO and OEI, and VMS Parameters to include description of all components, normal pilot operations, emergencies, and pilot trouble shooting.

Day 3

AFCS

2.0 Hours

SCOPE: This block of instruction will consist of an Automatic Flight Control System overview, to include description of all components, normal pilot operations, emergencies, and pilot troubleshooting.

Day 3 continued

FLIGHT TRAINING

2.0 hours

Flight

2.0 Hours

Review emergency procedures

Limitations review

OEI

FADEC Failures

HELIONIX
