

Keep trust in Air travel

Airbus studies reveal **very low risk** of particle exposure for passengers

Physical distancing onboard aircraft **can be achieved** even with **all seats occupied**

Cabin air is **fully renewed** every 2-3 minutes

Constant injection of **fresh air**

Hospital-grade filters remove >99.9% of particles

Optimised **top-to-bottom flows** limits air mixing between rows

Back of seats acting as barriers

All passengers wearing masks
