

Commercial Disputes

In May 2013, Airbus was notified of a commercial dispute following the decision taken by Airbus to cease a partnership for sales support activities in some local markets abroad. Airbus believes it has solid grounds to legally object to the alleged breach of a commercial agreement. However, the consequences of this dispute and the outcome of the proceedings cannot be fully assessed at this stage. The arbitration will not be completed until 2018 at the earliest.

In the course of another commercial dispute, Airbus received a statement of claim by the Republic of China (Taiwan) alleging liability for refunding part of the purchase price of a large contract for the supply of missiles by subsidiary Matra Défense S.A.S., which the customer claims it was not obliged to pay. An arbitral award was rendered on 12 January 2018 with a principal amount of €104 million plus interest and costs against Matra Défense S.A.S. Airbus is studying the award and considering the next steps.

1.1.8 Non-Financial Information

1.1.8.1 Airbus' Approach to Responsibility & Sustainability

Airbus and its Main Stakeholders

Airbus is an industrial company operating in businesses with long product lifecycles and corresponding returns on investment. There are significant costs and risks in programme development and cyclical civilian markets. These features define the Company and shape its relationships with all stakeholders. For a description of Airbus' business model, see "— 1.1.1 Overview".

Airbus is engaged in stakeholder dialogue at various levels of the Company. Cooperation being at the heart of Airbus since its inception, the Company strongly encourages exchanging on best practices, understanding different perspectives and improving its performance in every activity. The responsibility for stakeholder engagement is decentralised at Airbus and employees are encouraged to initiate, develop and maintain relationships with their respective stakeholders. Airbus often seeks a sectorial approach in order to strengthen the impact.

The Company's main purpose, its missions and the objectives resulting from them, are defined in relation to these stakeholders. The Company has defined the following objectives:

- generate long-term value by developing a sustainably profitable portfolio of aeronautics, helicopter, defence and space businesses. For its shareholders, lenders and other financial counterparts, the Company must meet its obligations and foster its standing of creditworthiness and profitability;
- be a provider of choice, offering superior value-for-money products and services to customers;
- engage employees to share its goals and rise to its challenges. Within the confines of applicable laws and regulations, Airbus must respond to their expectations about development, people management and values;

- build sustainable relationships with its suppliers based on mutual interest to satisfy its customers to encourage responsible practices. The Company promotes the Supplier Code of Conduct as standards consistent with its own code of conduct, and also develops and implements adequate mechanisms to monitor supplier performance;
- Play a key role in society and towards local communities. The Company is committed to responsible business practices in terms of respect for human rights, labour, the environment and anti-corruption. In addition, the Company encourages initiatives that contribute to tackling societal challenges whether through its products and services, skills and resources or via key partnerships.

Materiality Assessment

In order to prioritise its responsible and sustainable efforts, Airbus has performed a materiality assessment in 2017. With the support of consultants, Airbus approached a set of stakeholders representing customers, works councils, local community partners, NGOs, technological partners, investors, airworthiness authorities, MROs, government bodies, suppliers and industry associations. Airbus chose a qualitative approach rather than a quantitative approach. In-depth interviews were conducted with external stakeholders. A list of top issues for the Company was developed, consolidated and ranked by the Company's Responsibility & Sustainability Network. The network gathers a group of experts advising on Airbus' Responsibility & Sustainability ("R&S") strategy, monitoring progress in their respective areas of responsibility, sharing knowledge and best practices throughout the entire Company. It is trans-functional, trans-national and trans-divisional and meets on a regular basis. The outcome of this assessment was shared with top management.

MATERIALITY MATRIX 2017

UN Sustainable Development Goals

Airbus is committed to the UN Global Compact principles and has reached the “Advanced Level”.

Airbus adopted the UN Sustainable Development Goals (SDGs) in December 2015 as a framework to align its responsible and sustainable contributions. Over 2016, Airbus performed a mapping of its contributions based on the Company’s publicly available information (including the Company’s web site, annual report and press releases). It demonstrated that at least eight of the 17 SDG goals are directly relevant to Airbus’ businesses and stakeholders’ feedback confirmed that Airbus is actively contributing to:

- SDG 4: Quality education;
- SDG 5: Gender equality;
- SDG 8: Decent work and economic growth;
- SDG 9: Industry, innovation and infrastructure;
- SDG 12: Responsible consumption and production;
- SDG 13: Climate action;
- SDG 16: Peace, justice and strong institutions;
- SDG 17: Partnerships for the goals.

Throughout 2017, Airbus continued the mapping internally and identified KPIs to assess its overall contributions to the above SDGs. Measurement will start in 2018.

Responsibility & Sustainability Charter

In 2017, Airbus has outlined its commitments in a new R&S Charter. The aim of the Charter is to demonstrate how Airbus intends to contribute to the requirements and needs of society and how employees will live Airbus’ six values in their daily work with all stakeholders whether customers, suppliers, partners, shareholders. The Charter is available at www.airbus.com.

Airbus’ Way Forward: Vigilance Plan

Airbus is determined to conduct its business responsibly and with integrity. The Company is convinced that promoting responsible business conduct within our value chain is key to sustainable growth.

As far as its own operations are concerned, Airbus has adopted internal policies and management tools to perform the assessment, monitoring, mitigation, reporting of risk and compliance allegations. They are fully embedded into the Company’s culture and processes. At Airbus, heads of programmes and functions, supported by their respective specialists, shall ensure proper deployment of the Company’s policies, management of Enterprise Risk Management (ERM) in their fields as well as duly reporting issues to top management. Airbus’ approach is thus based on its existing strengths:

- 1) strong management process already established and adopted by employees;
- 2) empowerment of specialists;
- 3) industry approach whenever possible.
