

In order to support recruitment of women in all areas, Airbus has entered into partnerships to increase the number of women starting a career in the aeronautical industry – for example with *Capital Filles*, Women in Aviation, IAWA. Internally, an I&D network of over 4,000 employees work on how to attract, develop and retain diverse profiles, especially women, in the Company. In parallel, Airbus strives to increase the number of women in leadership positions, including through dedicated coaching and training such as “I Unleash My Potential” as well as by fighting stereotypes in internal conferences or workshops. In terms of internationalisation of profiles, Airbus facilitates the attraction of talents from around the world to Airbus’ traditional home countries (France, Germany, Spain, UK) through an International Graduate Programme enabling talents from all around the world to come and work on their development over one year at Airbus sites in Europe. In addition, Airbus also put in place several actions to boost mobility from other regions to the home countries.

Although Airbus welcomes many forms of diversity, it measures the evolution of the diversity of its workforce with a specific focus on gender diversity and internationalisation with key KPIs such as: proportion of women promoted to a position of senior manager or above, proportion of women among white collar external hires, gender pay gap (if any) at all levels between

women and men, and the number of moves from the key countries (including India, China, US) to the home countries.

Airbus has launched several actions to embrace other forms of diversity, including:

- reverse mentoring to connect all generations in the Company;
- accompany the creation of Employees Resource groups like Pride@Airbus (LGBT+ network);
- coordinate all local strategies towards disability with several thousand differently abled employees all around the world.

Finally, Airbus offers a wide scope of trainings supporting I&D initiatives and has also embedded a diversity aspect in leadership programmes.

As far as the Airbus Board of Directors is concerned, Airbus is moving in the right direction with 3 women in 2017 compared to not a single woman on the Board in 2013. They are Catherine Guillouard, Claudia Nemat, María Amparo Moraleda Martínez.

For a description of the diversity policy of the Airbus Board of Directors, see “— Corporate Governance — 4.1.1 Corporate Governance Arrangements” under the heading “Board of Directors” and “— Corporate Governance — 4.1.2 Dutch Corporate Governance Code”, “Comply or Explain” under the heading “Gender diversity”.

| | 31 December 2017 | 31 December 2016 | 31 December 2015 |
|---------------------------------|------------------|------------------|------------------|
| Women in active workforce ✓ | 17.5% | 17.2% | 17.2% |
| Women in management positions ✓ | 12.4% | 11.4% | 10.9% |

The % of women in management positions only applies to the top 4% of the active workforce.

1.1.8.4. Responsible Business

a. Ethical Business Practices

Leading by Example

The Airbus Ethics & Compliance Programme seeks to ensure that the Company’s business practices conform to applicable laws, regulations and ethical business principles, as well as developing a culture of integrity.

In 2017, Ethics and Compliance was a top priority for Airbus. In its list of priorities for the year, Airbus set the objective to:

“Engage and develop our people worldwide to excel today and tomorrow by adopting key digital skills and mind-set, reinforced ethics & compliance adherence and a strong focus on diversity”.

Airbus also announced the appointment of an Independent Compliance Review Panel (ICPR) composed of eminent external consultants to help Airbus further improve its processes. The ICPR members are Lord Gold from the UK, Noëlle Lenoir from France and Theo Waigel from Germany. All well-versed in compliance monitoring of large corporations, they will have access to all levels of the Company and will report to the Airbus CEO and Board on how to further improve Airbus’ compliance processes, policies, organisation and culture.

Compliance is at the heart of everything Airbus does today – Airbus is putting significant resources and effort into supporting the coordinated criminal investigations by the UK Serious Fraud Office (SFO) and France’s Parquet National Financier (PNF). For further information on the investigations, see “— 1.1.7 Legal and Arbitration Proceedings”.

Our Commitment

Over the years, Airbus has earned the trust of passengers, customers, operators and other stakeholders through the quality and safety of our products. To fully serve our communities and thrive in the future, our commitment to business integrity must be just as robust – this means conducting our business ethically and based on Airbus values, and in compliance with all laws and regulations.

As part of this commitment, Airbus supports the principles of the UN Global Compact and IFBEC’s Global Principles of Business Ethics which set a benchmark for high ethical standards globally.

Our Standards

The foundation for integrity at Airbus is the Standards of Business Conduct. These Standards are intended to guide daily behaviour and help employees resolve the most common ethical and compliance issues that they may encounter.

The Standards of Business Conduct apply to all employees, officers and directors of Airbus as well as entities that Airbus controls. Third-party stakeholders whom Airbus engages are also expected to adhere to these Standards of Business Conduct in the course of performing work on our behalf.

Our Programme

While the Standards of Business Conduct provide a useful starting point, they cannot answer all questions, nor are they sufficient to ensure that Airbus complies with the myriad legal requirements applicable to its business. Because of this, Airbus has worked over the past several years to develop an Ethics & Compliance programme that is structured around four key risk areas: Business Ethics/Anti-Corruption Compliance, Export Compliance, Data Protection Compliance and Procurement Compliance.

Each of these areas is, in turn, supported by dedicated compliance policies and a team responsible for their implementation, together with the identification and proposal of new measures to adapt to a constantly evolving regulatory landscape.

Improving the programme is a constant and ongoing process, not only in the area of Business Ethics/Anti-Corruption but across the ethics and compliance spectrum more generally in order to capitalise on our values.

Business Ethics/Anti-Corruption Compliance

Airbus rejects corruption of any kind, whether public or private, active or passive. This means that neither Airbus, its employees or third parties acting on its behalf may offer, promise, give, solicit or receive – directly or indirectly – money or anything of value to or from a government official or someone in the private sector in order to obtain or retain business or secure some other improper advantage.

The Anti-Corruption Policy (available at <http://company.airbus.com/dam/assets/airbusgroup/int/en/group-vision/ethics-compliance/documents/Airbus-Group-Anti-Corruption-Policy.pdf>) summarises its stance of zero tolerance. It also refers to some of the specific directives Airbus has adopted to address key anti-corruption risk areas, such as the engagement of third parties, gifts and hospitality exchange and the making of sponsorships and donations.

More broadly, Business Ethics at Airbus also covers other areas such as conflicts of interest, anti-competitive conduct, insider trading, fraud, etc., while also complementing the Airbus Corporate Social Responsibility programme which focuses on managing the social and environmental impacts of Airbus's operations.

Export Compliance

Each of the countries in which Airbus does business has controls on the export and transfer of its goods and technologies that are considered to be important to national security and foreign policies. As a global enterprise, it is Airbus' responsibility to

respect and comply with each of these controls. The Export Compliance Directive defines its policies, processes and organisation to ensure compliance with all relevant export control laws and regulations.

Data Protection Compliance

Airbus is required to handle personal data in accordance with applicable data privacy laws at national, European and international level. In doing so, Airbus seeks to apply a consistent approach, by setting data security standards for personal data processing in line with global best practice. This is embodied in part by its Binding Corporate Rules (available at <http://company.airbus.com/dam/assets/airbusgroup/int/en/group-vision/ethics-compliance/documents/Airbus-Group-BCR-/Airbus%20Group%20BCR%20.pdf>), which provide a consistent level of protection for various personal data throughout Airbus.

Procurement Compliance

Airbus suppliers must comply with all applicable laws and regulations of the countries in which operations are managed or services provided. In addition, wherever suppliers are located, all business should be conducted in a manner compatible with the Airbus Supplier Code of Conduct (available at <http://company.airbus.com/dam/assets/airbusgroup/int/en/group-vision/ethics-compliance/documents/Supplier-Code-of-Conduct/Supplier%20Code%20of%20Conduct.pdf>). Suppliers are also expected to cascade these principles through their own supply chain. For further information see “— Responsible Suppliers” below.

Our E&C Organisation

The Ethics & Compliance organisation is part of the Legal Department under the ultimate responsibility of the Airbus General Counsel. The aim is to provide strong governance throughout the Company with the global presence of qualified compliance officers who ensure the compliance programme is implemented in the different functional and operational areas.

They do this in close cooperation with its employees and management, who are expected to lead with integrity by example and take responsibility for compliance within their scope of activity.

New and Updated Policies

In January 2017, Airbus published a directive defining the requirements for sponsorships, donations and memberships. The directive establishes a Company-wide framework and provides guiding principles and clear instructions on how to request, approve and record contributions.

In February 2017, Airbus published a directive defining the requirements for the prevention of corruption in the engagement of lobbyists and special advisors. The purpose of the directive is to ensure that Airbus' political engagement through lobbyists or special advisors remains fully transparent and ethical, and facilitates Airbus' compliance with all applicable laws.

In June 2017, an updated version of the Airbus Standards of Business Conduct was published, to comply with the requirements of France's new Sapin II law. The updated version defines both bribery and influence peddling, and provides illustrations of each. Changes were also made to cross-refer to the Airbus Anti-Corruption Policy, and to include a new section on Anti-Money Laundering.

In June 2017, an updated version of the Airbus OpenLine Policy was also published, to enhance the provisions to protect the whistleblower from retaliation in line with Sapin II.

In September 2017, Airbus published its revised Business Development Support Initiative Directive (BDSI). The directive defines the Airbus requirements for the prevention of corruption in the engagement of BDSI third parties. It provides employees with step-by-step explanation of the due diligence, engagement, remuneration and monitoring of BDSI third parties.

In October 2017, Airbus published a directive defining the requirements for identifying and mitigating corruption risks in connection with M&A, JV and similar transactions. This directive is intended to help ensure a consistent approach to these matters across Airbus.

Our Awareness and Training

Airbus aims to educate its people about the standards of conduct that apply to their jobs and the potential consequences of violations. Target populations are reviewed annually and required to undergo training and awareness eLearning or face to face sessions based on job function, role and responsibility.

In 2017, Airbus conducted 84,273 Ethics & Compliance digital training sessions.

Our Confidential Speak-Up Channel: OpenLine

Airbus recognises that the Standards of Business Conduct cannot address every challenging situation that may arise. Airbus therefore encourages its employees to speak-up through various channels, including through OpenLine (<https://www.airbusopenline.com/>). The OpenLine enables employees to confidentially raise their concerns via the internet or by phone. Subject to local legal restrictions, the OpenLine alert system has been available for several years to employees in France, Germany, Spain, UK, Canada, Brazil, Australia and the US. In 2014, it was made available to employees in Mexico, China and Saudi Arabia. Airbus does not tolerate retaliation against employees making reports in good faith and/or assisting in investigations of suspected violations of the Standards of Business Conduct. For further information on the OpenLine please refer to the Airbus Group OpenLine Policy (available at <https://www.airbusopenline.com/PoliciesAndNotices>). Employees, customers, suppliers and third-party intermediaries are encouraged to share their concerns with management or with Ethics & Compliance resources.

b. Responsible Suppliers

Airbus designs and integrates complex aerospace and defence products, leveraging an extensive supply chain. Co-operation with suppliers occurs in several fields of the business and is key to ensure quality standards which lead to shared success, growth through innovation and a commitment to sustainability. Airbus also engages its suppliers on its sustainability journey and shares a commitment to improve social and environmental performance, constantly driven by values of integrity and transparency.

1. Procurement at Airbus

More than 15,000 suppliers from more than 100 countries supply parts, components or sub-systems to Airbus. In 2016, Airbus spent around €49 billion with its suppliers. The Procurement function is improving its performance through creating a more integrated, effective and lean organisation. It aims at increasing harmonisation of internal and supplier-related processes, job profiles, training processes and tools.

Whilst Airbus products and services are sold all over the world, the majority of its workforce and supply chain are based in Europe and the Organisation for Economic Cooperation and Development (OECD) countries. In the past few years, the supply chain has become concentrated and more international. Such rising concentration is the result of consolidation within the aerospace and defence sector, as well as larger work packages for the major new aircraft programmes being placed with a smaller number of lead suppliers. Airbus has identified global sourcing as one of its leading long-term objectives. To promote the globalisation of its sourcing footprint, an Airbus Global Sourcing Network (GSN) has been established including regional sourcing offices in USA, China and India.

2. Responsible Supplier Management

As a global leader in aeronautics and space, Airbus has taken a commitment to conduct its business responsibly and with integrity. Taking into consideration the level of outsourcing at Airbus, the supply chain is an integral part of Airbus' ecosystem and the Company is therefore committed to ensure that, as far as possible within its own scope of responsibility and legal obligations, potential adverse impacts of Airbus activities are managed. The Procurement function is ISO 14001 certified as part of the global Airbus environmental certification.

The Airbus Supplier Code of Conduct is the document of reference for Airbus' responsible supplier management. This Code represents the group-wide values and principles in line with internationally recognised standards and conventions (such as OECD and ILO). It has been developed with the International Forum on Business Ethical Conduct (IFBEC) in 2015 in the form of a Model Supplier Code of Conduct. Airbus is proud to be a co-founder of IFBEC, which supports the application of global standards for business ethics and compliance in the aerospace and defence industries. Airbus implemented the IFBEC Model Supplier Code of Conduct in its entirety as the Airbus Supplier Code of Conduct in 2016.
