

## Relationship between Airbus SE and the Company

Airbus SE itself does not engage in the core aerospace, defence or space business of the Company but coordinates related businesses, sets and controls objectives and approves major decisions for the Company. As the parent company, Airbus SE conducts activities which are essential to the Company's activities and which are an integral part of the overall management of the Company. In particular, finance activities pursued by Airbus SE are in support of the business activities and strategy of the Company. In connection therewith, Airbus SE provides or procures the provision of services to the subsidiaries of the Company. General management service agreements have been put in place with the subsidiaries and services are invoiced on a cost plus basis.

For management purposes, Airbus SE acts through its Board of Directors, Executive Committee, and Chief Executive Officer in accordance with its corporate rules and procedures as described below under “— Corporate Governance — 4.1 Management and Control”.

Within the framework defined by Airbus SE, Airbus, each Division, Business Unit and subsidiary is vested with full entrepreneurial responsibility.

### 1.1.2 Airbus (Commercial Aircraft)

Airbus is one of the world's leading aircraft manufacturers of passenger airliners. In order to help shape the future of air transportation and drive steady growth around the world, Airbus seeks incremental innovative technological solutions and the most efficient sourcing and manufacturing possible – so airlines can grow and people can connect. Airbus' comprehensive product line comprises successful families of jetliners ranging in capacity from 100 to more than 600 seats: the A220 Family; the A320 Family, which is civil aviation's best-selling product line; the A330 Family, including the advanced A330neo; the new-generation widebody A350 XWB; and the double-deck A380. Across its aircraft families Airbus' solutions ensure that aircraft share high commonality in airframes, on-board systems, cockpits and handling characteristics. This significantly reduces operating costs for airlines. See “— 1.1.1 Overview” for an introduction to Airbus.

Airbus' global presence includes activity in Europe (France, Germany, Spain and the UK), as well as in Canada, and more globally at fully-owned subsidiaries in the US, China, Japan, India and in the Middle East, and spare parts centres in Hamburg, Frankfurt, Washington, Beijing, Dubai and Singapore. Airbus also has engineering and training centres in Toulouse, Miami, Mexico, Wichita, Hamburg, Bangalore, Beijing and Singapore, as well as an engineering centre in Russia. There are also hubs and field service stations around the world. Airbus also relies on industrial co-operation and partnerships with major companies and an extensive network of suppliers around the world.

#### Strategy

Airbus' primary goal is to deliver strong results in a sustained manner, while commanding a further increased share of the worldwide commercial aircraft market over the long-term and expanding its customer services offering. To achieve these goals, Airbus is actively:

#### Developing the Most Comprehensive Line of Products in Response to Customer Needs

Airbus continuously seeks to develop and deliver new products to meet customers' evolving needs, while also improving its existing product line. Programme highlights for 2019 included:

- launch of increased range capability for the A220 to over 6,000 km from 2021;
- first flight of the ACJ319neo in April;
- delivery of the 12,000<sup>th</sup> Airbus aircraft in May;
- launch of the A321XLR variant to meet the needs of the rapidly developing mid-capacity, mid-range market;
- launch of high-density A330neo variant, offering over 440 seats;
- delivery of the first A350-900 Domestic variant;
- delivery of the 1,000<sup>th</sup> A320neo Family aircraft in October.

To support the A350 XWB ramp-up and other production increases, a new super transporter has been developed, with the first of six Beluga XL aircraft entering into service in January 2020.

Airbus remains at the forefront of the industry by expanding its customer services offering – see Customer Services.

#### Building a Leaner, More Fully Integrated Company

In order to build a leaner, more fully integrated company and thereby bolster its competitiveness, Airbus is adapting its organisation to foster an entrepreneurial spirit and empower more teams, while maintaining harmonised processes across all sites. For series programmes, additional responsibilities and means have been delegated to plants for delivery at increased rates. Airbus also has become a more integrated company, working towards one common culture across its global workforce, as well as aligning processes and planning with the global supplier base.
