

c. Health & Safety

I. Introduction

The Company is committed to pursuing the highest standards of health and safety. The Company's health and safety priorities are the following:

1. protecting our people and the business from health and safety risks that could arise from our work activities;
2. fostering a health and safety culture in which we all accept appropriate responsibility for ourselves and others;
3. ensuring good management of work-related health, safety, and well-being as an ethical and commercial imperative, and
4. business sustainability and compliance with the UN Global Compact

These priorities are expressed in the newly issued Airbus Code of Conduct.

II. Governance

The company-wide Occupational Health and Safety Policy, issued in 2018 is the foundation of the Company's system for management of health and safety at work. It applies company-wide: to Airbus' commercial aircraft activities, Airbus Helicopters and Airbus Defence and Space Divisions including affiliates.

The policy principles, mission and vision, and key initiatives continue to apply:

- policy principles:
 - responsible management of health and safety;
 - all employees accepting appropriate responsibility for themselves and others;
 - a health and safety management system that drives continuous improvement and compliance;
 - a preventative approach.
- health and safety mission and vision:
 - our mission is to deliver a culture and management system that promotes health and safety at work, related compliance, and the sustained reduction of health and safety risks related to Airbus work activities;
 - our vision is that the Company has world class health and safety risk management and is known as a company where safety, health and welfare are valued as an integral part of our success. The Company aspires to zero work related injuries and ill-health.
- key initiatives:
 - a health and safety management system based on the principles of the ISO Standard 45001;
 - the implementation of a company-wide health and safety software platform (Federated Information for Safety, Health and environment (“FISH”));
 - the reinforcement of a company-wide health and safety function by the harmonisation of health and safety philosophy and methodology.

This report further details the application of the policy principles and status of key initiatives.

Centres of Expertise are being developed within the health, safety and operational environment “Centre of Excellence”.

These Centres of Expertise address the various specialised disciplines of health and safety and environment, and engage the necessary key skills and competences. In addition, they are able to embark “Communities of Practice” where needed to work on particular topics. These Communities of Practices are the evolution of the former transversal expert groups, providing advice and helping to improve management of risk control work, on the domains of industrial hygiene, occupational health and wellbeing, and safety management.

III. Risk Management

The Company continues structuring its corporate health and safety management framework based on the principles of the international standard – ISO 45001. Airbus sites either are pursuing systems based on the ISO 45001 principles, or are already ISO 45001 certified, or are OHSAS 18001 certified and progressively transferring to ISO 45001.

The Company is reinforcing its health and safety risk management process by building a standardised and company-wide method for risk assessment and control. The escalation process for significant health and safety top risks has also been further developed to raise such risks to top management, using the Company's ERM system. In common with many manufacturing organisations, main risks remain the possibility of injury, ill-health, asset damage, business interruption and regulatory action. In 2019, main causes of injury that could arise from work activities included slip, trip and fall, ergonomics and the use of hand tools and equipment. These represent the majority of injuries recorded using the FISH platform.

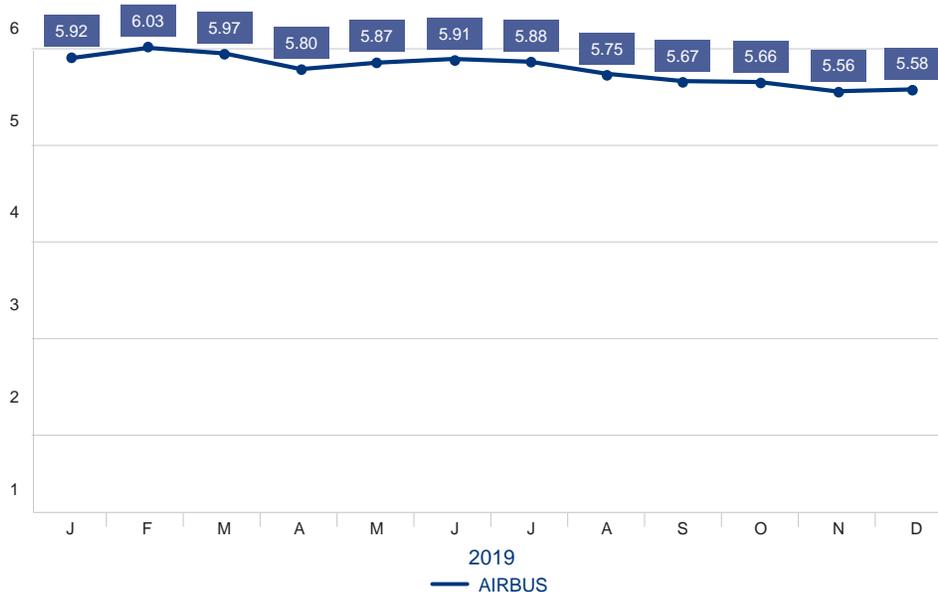

Since 2018, the FISH platform has been supporting the company-wide management framework for health and safety at work. The Company continued the development of the platform in 2019, enhancing the Company's incident, risk, health and safety capability.

The incident management module of the platform has now been deployed in Airbus and its Divisions in France, Germany, Spain and the UK, as well as the Airbus commercial aircraft plants in Mobile, USA and in Tianjin, China. The module supports the investigation, evaluation and analysis of work-related incidents and the development of risk mitigation actions. The deployment of the incident management module and the overall harmonisation process have allowed improvement in the production and collection of the overall company-wide key performance indicator, detailed below (rolling year average of the Lost Time Injury Frequency Rate).

The FISH platform will progressively improve the Company's ability to collect, analyse and report on work-related health and safety information, continuously improving the identification and mitigation of risk.

Collection of health and safety data has allowed Airbus to produce and publish an accident indicator at a company-wide level. The reporting scope of this harmonised health and safety data (reflected in the table below) covers Airbus and its Divisions for the four home countries as well as the Airbus commercial plants in Mobile, USA and Tianjin, China, and continues to be progressively extended. The table below represents the rolling year average of the Lost Time Injury Frequency Rate.

Airbus and its Divisions Rolling 12 Months Employee Lost Time Injury Frequency Rate

The People Safety@Work project was launched for Airbus' commercial aircraft activities in mid-2018. This project has the motto "Nearly Safe is Not Safe", and it aims to improve the management of work-related injuries in operational areas and drive a safety mind-set. The project purpose is to embed a culture of excellence and a mind-set where risk prevention is core. The project is structured through a multi-functional team involving all impacted functions (e.g. Human Resources, Industry, Final Assembly Line, Facility Management, Procurement). The project has been extended company-wide in 2019. Actions from the People Safety@Work project are detailed in the Initiatives section, together with other health and safety actions, and have been included in the Next Chapter initiatives company-wide.

Since 2018, the particular focus on health and safety has been strongly supported by the Airbus Executive Committee, the roll out of the FISH reporting platform and the implementation of dedicated safety projects such as People Safety@Work, have reinforced the need to report incidents. This resulted in an increase of the Lost Time Injury Frequency Rate in 2018. In 2019, the rate slightly decreased.

IV. Initiatives

Dedicated initiatives, either local or company-wide focussing on occupational safety have been launched in 2019:

- safety rules have been harmonised company-wide, by the creation of "6 Primary Safety Rules";
- various communication campaigns have been run to remind workers of common health and safety issues, such as holding the handrail, being attentive and not focussed on mobile phone, wearing their safety cap;
- safety days focusing on topics such as chemical hazards, road risk prevention, first aids;
- "Safety Labs" have been installed in most of the Airbus' commercial aircraft sites. The Safety Labs are places to meet and exchange on safety subjects;
- the Airbus Helicopter "Safety Boxes" concept has been adopted for Airbus commercial aircraft activities to reduce accidents and incidents by gaining employee commitment to

safety rules. The Safety Boxes consist of a number of different activities which help to trigger discussion on safety matters between participants in an informal way. So far, ten Safety Boxes have been deployed for Airbus' commercial aircraft activities and more are planned for 2020.

As part of the continuous improvement objective, the "REACH-IT" project within Airbus' commercial aircraft activities has pursued its initiatives to review Airbus manufacturing processes, tools and workstations in light of the REACH authorisation application measures for environment, health and safety protection. Similar initiatives are ongoing in the Divisions.

A review of on-site sub-contracting processes has been performed for Airbus' commercial aircraft activities and a project has been launched in order to harmonise the on boarding process of our on-site sub-contractors.

Employees' health is protected by programmes that include mandatory and voluntary health checks, health campaigns such as flu vaccination campaigns, stress or addictions guides, skin, vein or cardiovascular screenings and well-being management. Wellbeing weeks have been organised company-wide focusing on topics such as mindfulness, sophrology, harassment prevention.

The Company continues to use learning to support the integration of health and safety into the business culture, and has worked on the harmonisation of employees' training to ensure consistently high standards of delivery.

- From October 2018 to September 2019, the Company delivered over 148,000 hours of dedicated health and safety training to approximately 20,900 individual employees.
- Executives and managers have been encouraged to focus on health and safety, supported by a dedicated leadership development strategy.
- Executives are provided with an "Environment and Health and Safety Masterclass" to enable their visible and active commitment. In 2019, over 70 executives attended the Environment and Health and Safety Masterclass.

- Additionally, the executives are offered practical training, “Back To The Floor”, to enable hazard-spotting and employee engagement during tours of factory floor. Over 200 executives have attended Back To The Floor since launch in May 2019.
- Managers at all levels attend the new “Airbus Environment and Health and Safety Leadership Certificate”. This intensive course has four modules, which, if completed within a certain period, lead to an externally validated “Environment, Health and Safety Certificate”. Over 300 managers have attended the Environment, Health and Safety Certificate first modules since launch in September 2019.

V. Future Outlook

The reinforcement of the health and safety organisation will be pursued in 2020 to continuously enhance the health and safety management system with the aim to sustainably reduce risk to people, the environment and the business.

d. Inclusion & Diversity

The Company is convinced that diversity helps foster innovation, collective performance and engagement. Harnessing everyone's unique potential while ensuring an inclusive workplace is what it takes to succeed together. At Airbus, we live diversity as a core part of our identity: Airbus is proud of its European roots and passionate about its achievements around the world. More than 135 nationalities are represented and more than 20 languages are spoken within the Company.

The Company's approach to Inclusion & Diversity (“I&D”) takes different forms including: I&D Advisory Board composed of Airbus executives and facilitated by the Head of I&D, dedicated training and awareness, internal incentives for international mobility, initiatives to attract women, flexible work-life solutions. In fact, the Company strives to ensure I&D is embedded in all it does, serves business purposes and benefits all employees worldwide. With full support of the entire HR function, I&D initiatives are run and coordinated by a dedicated team of experts worldwide. The Company's efforts are supported by platforms for exchange like “Knowing Me, Knowing You” and “Disability Community”.

The Company's efforts towards more inclusion and diversity are also supported by Employee Resource Groups (ERGs) through Balance For Business, the federating platform of Airbus ERGs. These are employee-led groups that foster a diverse, inclusive workplace aligned with organisational mission, values, goals, business practices and objectives. To date, this platform brings together over 11,000 volunteers, followers and allies. It is a group-wide business focused platform seeking to harness everyone's potential in a more responsible, safe, inclusive and balanced Airbus environment.

In line with its aspiration for a more diverse workplace, the Company is working to increase the number of applications from areas that are currently under-represented in its workforce, including but not limited to women, nationalities, age groups, disability and social backgrounds to ensure a broader range of candidates for open positions.

In order to support recruitment of women in all areas, the Company has entered into partnerships to increase the number of women starting a career in the aeronautical industry – for example with Capital Filles, Women in Aviation and IAWA. Internally, an I&D network of over 4,000 employees work on how to attract, develop

and retain diverse profiles, especially women, in the Company. In parallel, the Company strives to increase the number of women in leadership positions, including through dedicated coaching and training such as “I Unleash My Potential” as well as by fighting stereotypes in internal conferences or workshops. In terms of internationalisation of profiles, Airbus facilitates the attraction of talents from around the world to Airbus' traditional home countries (France, Germany, Spain, the UK) through an International Graduate Programme enabling talents from all around the world to come and work on their development over one year at Airbus sites in Europe. In addition, Airbus also put in place several actions to boost mobility from other regions to the home countries. In regards to differently-abled profiles, Airbus has developed several partnerships to increase the number of applications from people with disabilities, like “Atout pour tous”, “Handisup” and “Handi Pro Conseil”. Airbus has created as well the “Club Handilink” in France, a club composed by aeronautical and aerospace companies to federate and foster best practices sharing about disability inclusion.

Although the Company welcomes many forms of diversity, it measures the evolution of the diversity of its workforce with a specific focus on gender diversity, internationalisation and disability with key KPIs such as: proportion of women promoted to a position of senior manager or above, proportion of women among white collar external hires, gender pay gap at all levels between women and men, and the number of moves from the key countries (including India, China, US) to the home countries and disability employment rates.

The Company has launched several actions to embrace other forms of diversity, including:

- reverse mentoring to connect all generations in the Company;
- accompany the creation of Employees Resource groups like Pride@Airbus (LGBT+ network);
- develop a world-wide strategy together with local initiatives towards disability, with several thousand differently abled employees all around the world, that boosts best practices sharing and awareness towards disability inclusion.

For example, promoting the people-centric approach, a specific focus on the competences of and support to differently-abled candidatures to boost their access to employment at Airbus. This process was created at Airbus in France and thanks to it, Airbus has succeeded in doubling its disability recruitment objectives in 2019. Based on its success, Airbus is extending this people-centric approach to other countries like Spain, and business units, such as Airbus Defence & Space and Airbus Helicopters in France.

Another example is the Airbus Ability Weeks campaign, a three weeks world-wide awareness campaign in which Airbus hosts many activities with the objective of challenging the way we think about disability inclusion, promoting an “all concerned” philosophy towards disability inclusion.

As far as the Airbus SE Board of Directors is concerned, the Company is moving in the right direction with 3 women since 2017 compared to not a single woman on the Board in 2013.

For a description of the diversity policy of the Airbus SE Board of Directors, see “— Corporate Governance — 4.1.1 Corporate Governance Arrangements” under the heading “Board of Directors” and “— Corporate Governance — 4.1.2 Dutch Corporate Governance Code, ‘Comply or Explain’” under the heading “Gender Diversity”.
