GRADUATE

Graduate line of services is aimed at acquiring in-depth technical knowledge on a specific Airbus Helicopters rotorcraft.

Courses are designed for crew and technician teams and lead to official type qualification.

Pre-entry and add-on modules can complement the type qualification*.

* Examples optional courses:
  Pilots: Crew Resource Management, Type Rating Instructor, Type Rating Examinator…
  Technicians: Airframe repair, technical documentation, Mechanical assy, standard practices…

AIRBUS HELICOPTERS STANDARDS
Who better than the Original Equipment Manufacturer knows the exact behavior of the helicopter in flight?

COST EFFECTIVE
Find the adapted solution in our catalog according to the trainee’s profile and background.

WORLDWIDE
Our training courses are available throughout our global network.
Within our Master service range, trainees will benefit from in-depth specialization on favorite mission equipment in addition to their type qualification.

The training focuses on the use of equipment and its impact on the helicopter’s behavior.

Pre-entry and add-on modules can also complement the type qualification.

MODULAR
The program can be complemented with modules according to trainees’ profile.

MISSION-ORIENTED
Courses built-up upon mission equipment favorite configuration.

ON-SITE
Our teams may accompany pilots at your premises to ensure an optimal start of operations.
The Honors range of services allows the operators to define their training objectives for crews and technicians. Whatever the target, Airbus Helicopters will provide a tailored training program that suits customer’s expectations. This end-to-end service may also include pre-entry and/or maturation modules, as well as training means and media, and up to a complete cooperation on the set-up of customer training centers.

SUCCESS-ORIENTED
You define the target, we take care about the adequate training program to be performed.

FULLY-CUSTOMIZED
We build up specific courses according to the trainees’ background and profile.

COMPLETE
We can help you develop your own training facilities, means and programs.
