Airbus to keep NASA’s helicopters flying for up to 10 years

The $15million HCare Infinite support contract will cover NASA’s H135 fleet

GRAND PRAIRIE, Texas, Sept. 17, 2020 – The National Aeronautics and Space Administration (NASA) has signed a $15million HCare Infinite full-availability support solution with Airbus Helicopters, Inc. The comprehensive contract, initially covering two years with the option to extend up to 10, provides the entire spectrum of support needs for NASA’s fleet of three H135 helicopters, which will begin deliveries later this month.

Airbus will ensure operational availability by managing all of NASA’s scheduled and unscheduled maintenance, as well as spare parts. In addition, Airbus will be responsible for the helicopter flight operations by stationing two pilots, two mechanics and one program manager at NASA’s Kennedy Space Center (KSC) in Florida.

“With this new HCare contract, NASA is relying on Airbus’s manufacturer expertise for the comprehensive management of all support and service needs. The OEM experience and knowledge will provide support as NASA transitions from an aging aircraft fleet into the advanced H135 helicopter,” said David Ramsey, Chief of Flight Operations at NASA Kennedy Space Center. “The OEM level of expertise will ensure that the transition of aircraft is a smooth and safe process and will allow KSC Flight Operations to focus our attention on supporting those NASA Programs and Partners that are advancing science, technology, aeronautics, and space exploration.”

NASA will operate their new fleet of H135 helicopters, purchased as part of a fleet renewal initiative, at Cape Canaveral for a variety of missions including security around rocket launches, emergency medical services, and qualified personnel transport.

“Our customers’ success lies in their ability to ensure aircraft are ready to take off the second they need them, and our HCare support solutions provide the guarantee that we have taken care of everything to ensure their full fleet availability,” said Anthony Baker, vice president of Customer Support and Services at Airbus Helicopters, Inc. “Our entire team is extremely proud to support the future of space exploration by providing both new helicopters and full support services to NASA.”
HCare Infinite is Airbus’ most comprehensive level of customer support and requires the company to guarantee the customer’s full fleet operational availability, including maintenance, technical support, and the supply of spare parts, tools and consumables. Airbus Helicopters’ range of HCare material management services starts out with Easy (on-request catalogue services) and Smart (four by-the-hour options), before progressively building up to Infinite (full availability commitments).

Airbus Helicopters Inc. is the leading supplier of helicopters in the United States, with a market share of nearly 65% and a presence dating back 50 years. A team of more than 750 employees operates local production and completion facilities for the H125 and UH-72 Lakota aircraft and provides world-class training, aftermarket support, and technical assistance for the North American regional in-service fleet of nearly 3,100 helicopters.
Airbus is a global leader in aeronautics, space and related services. In 2019, it generated revenues of € 70 billion and employed a workforce of around 135,000. Airbus offers the most comprehensive range of passenger airliners. Airbus is also a European leader providing tanker, combat, transport and mission aircraft, as well as one of the world’s leading space companies. In helicopters, Airbus provides the most efficient civil and military rotorcraft solutions worldwide.
