Airbus and Orbital Insight partner on The OneAtlas Platform to build world-class geospatial analytics

Toulouse, 12 September 2018 – Airbus Defence and Space has entered into a partnership with Orbital Insight, a U.S.-based geospatial analytics company, to build a suite of geospatial analytics services and tools. The agreement will provide Orbital Insight with access to Pleiades and SPOT satellite imagery at scale and provide Airbus with analytics services, making Orbital Insight the first analytics partner for the Airbus Digital Platform, "OneAtlas."

The OneAtlas Platform is a collaborative environment enabling users to easily access constantly updated satellite imagery, perform large-scale image processing, extract industry-specific insights, and benefit from Airbus assets to develop tailored solutions for a wide range of markets in both commercial and government sectors.

"Under this agreement, we will offer premium analytics capabilities to a large range of users, powered by Orbital Insight's services and tools," said François Lombard, Director of the Intelligence Business at Airbus Defence and Space. "The OneAtlas Platform is definitively the cornerstone to leverage both Airbus and partner assets to support our customers' business development and growth."

"We're proud to be Airbus' first geospatial analytics partner on The OneAtlas Platform," said Dr. James Crawford, Orbital Insight's CEO and founder. "Along with our new satellite imagery agreement, this partnership drives customer value for those looking to better understand what's happening on and to Earth."

About Airbus

Airbus is a global leader in aeronautics, space and related services. In 2017 it generated revenues of € 59 billion restated for IFRS 15 and employed a workforce of around 129,000. Airbus offers the most comprehensive range of passenger airliners from 100 to more than 600 seats. Airbus is also a European leader providing tanker, combat, transport and mission aircraft, as well as one of the world's leading space companies. In helicopters, Airbus provides the most efficient civil and military rotorcraft solutions worldwide.

About Orbital Insight

Orbital Insight develops geospatial analytics to help its clients unlock societal and economic trends at a global scale. The company sources petabytes of satellite, drone, balloon and other unmanned aerial vehicle (UAV) data. Using computer vision and machine learning technologies, it processes and transforms this data to enable businesses, governments and NGOs to make better decisions. Learn why Fast Company voted Orbital Insight one of the most innovative companies of 2017 and 2018 at www.orbitalinsight.com
