Farnborough International Airshow 2018

Japan Coast Guard signs HCare Smart for its H225 fleet

Airbus' material management programme will cover the maintenance of all ten helicopters over five years.

Farnborough, 17 July 2018 – Japan Coast Guard (JCG) has signed with Airbus Helicopters for an HCare Smart full-by-the-hour material management contract, for a period of five years. Beginning in July, the contract will cover comprehensive maintenance support, including parts-by-the-hour for JCG's H225 fleet. With the provision of all the parts needed for the maintenance of the rotorcraft in one single contract, this will yield better cost control and forecasting, as well as more efficient day-to-day management for JCG.

Earlier this year, JCG has placed an additional order of H225 helicopter, bringing its overall H225 fleet to a total of ten units by March 2021. The newly-signed HCare Smart contract will cover the entirety of ten H225s currently on order, of which five are already in service.

Olivier Tillier, Managing Director of Airbus Helicopters Japan said: "This being the first and most large-scale adoption of the HCare Smart programme in the Japanese parapublic market, makes it exceptionally meaningful for Airbus. JCG has been a long-standing customer for more than two decades, and it is fast becoming the largest Super Puma operator in Japan today. We are strongly confident that our highly adaptive HCare Smart programme will deliver high fleet availability, reduce aircraft down-time and reinforce the capabilities of JCG's fleet. Our Airbus Helicopters team in Japan is fully committed to ensure that JCG's fleet is always performing at its maximum readiness level, while ensuring the highest level of safety for all missions."

JCG currently operates three AS332s and five H225s. Over the last 25 years, its Airbus fleet has been involved in a multitude of activities, ranging from security enforcement and territorial coastal activities to disaster relief missions in Japan.

Airbus Helicopters' HCare services provide the most comprehensive aftermarket service coverage, grouped into five domains. Among them, HCare material management offers three different service packages – HCare Infinite, with a full availability commitment; HCare Smart, with four by-the-hour options; and HCare Easy, with on-request catalogue services.

About Airbus

Airbus is a global leader in aeronautics, space and related services. In 2017 it generated revenues of €59 billion restated for IFRS 15 and employed a workforce of around 129,000. Airbus offers the most comprehensive range of passenger airliners from 100 to more than 600 seats. Airbus is also a European leader providing tanker, combat, transport and mission aircraft, as well as one of the world's leading space companies. In helicopters, Airbus provides the most efficient civil and military rotorcraft solutions worldwide.
