Toulouse, 29 November 2019 – Airbus has celebrated the 100th A220 aircraft produced for a customer during a ceremony at the aircraft programme’s headquarters in Mirabel, Canada. The aircraft, an A220-300, destined for Riga, Latvia-based airBaltic, features a brand new and comfortable cabin layout with 149 seats plus a modernised livery.

The A220 Family is assembled at Airbus’ main Final Assembly Line in Mirabel and more recently, also at the programme’s second assembly line in Mobile, Alabama. The world’s first A220 (formerly called the C Series) was delivered in June 2016 to A220-100 launch operator SWISS.

airBaltic became the A220-300 launch operator when the Latvian airline received delivery of the first ever A220-300 three years ago, on 28 November, 2016. airBaltic has since then re-ordered A220-300 aircraft twice – bringing its firm order to 50 aircraft to become the current biggest European A220 customer. The airline now operates a fleet of 20 A220-300 aircraft.

In an extremely competitive market, the aircraft’s unequalled fuel efficiency and excellent performance has been instrumental to airBaltic which has an all-A220 fleet as the backbone of its new business plan. airBaltic is operating its A220 fleet to various European and Russian destinations as well as to the Middle East. It currently operates the longest flight on an A220 – a 6.5-hour flight from Riga to Abu Dhabi.

Initially designed and delivered as the Bombardier C Series, the A220 is the only aircraft purpose-built for the 100-150 seat market; it delivers unbeatable fuel efficiency and widebody passenger comfort in a single-aisle aircraft. The A220 brings together state-of-the-art aerodynamics, advanced materials and Pratt & Whitney’s latest-generation PW1500G geared turbofan engines to offer at least 20 percent lower fuel burn per seat compared to previous generation aircraft, along with significantly lower emissions and a reduced noise footprint. The A220 offers the performance of larger single-aisle aircraft.

Close to 100 A220s are in operation with six operators on four continents. At the end of October 2019, the aircraft had received 530 firm orders from over 20 customers worldwide.
