

2017 price adjustment for Airbus' modern, fuel-efficient aircraft

Toulouse, 11th January 2017 – Airbus has increased the average list prices of its aircraft by one percent across the product line, effective from January 1st 2017. This price increase has been calculated according to Airbus' standard escalation formula over the January 2016 to January 2017 period and takes into account the materials and commodities prices.

John Leahy, Chief Operating Officer Customers, Airbus Commercial Aircraft said: "Our new 2017 pricing affirms the value of Airbus' modern, comprehensive and fuel-efficient aircraft family." He added: "The price increase also reflects our customers' satisfaction with the winning combination of performance, operating economics and passenger experience."

About Airbus

Airbus is a global leader in aeronautics, space and related services. In 2015, it generated revenues of €64.5 billion and employed a workforce of around 136,600. Airbus offers the most comprehensive range of passenger airliners from 100 to more than 600 seats. Airbus is also a European leader providing tanker, combat, transport and mission aircraft, as well as Europe's number one space enterprise and the world's second largest space business. In helicopters, Airbus provides the most efficient civil and military rotorcraft solutions worldwide.
