AIRBUS HELICOPTERS CANADA LIMITED

1. GENERAL

- A. Removable Door Pins are utilized on the LH or RH or both doors to provide a "tool free" means to remove and reinstall the hinged doors. Pip pins replace the existing bolts and a spacer clip fits over the existing lower door fitting to replace the existing washers that are no longer used. Safety pins slide through holes in the bottom of the pip pins providing additional security. A Lanyard attached to each pip pin prevents the safety pin from being misplaced. Refer to General Layout, Figure 1.

The Removable Door Pins are installed in accordance with Master Drawing List MDL-14-005.

- B. These Instructions for Continued Airworthiness are applicable to aircraft with the subject modification embodied.

3. CONTROL AND OPERATION

Control and operation of the aircraft remain unchanged.

4. INSPECTION SCHEDULE AND MAINTENANCE ACTION
4.1. INSPECTION SCHEDULE

4.1.1. Every 12 months (to coincide with the 12 month helicopter inspection):

ITEM	INSPECTION OR MAINTENANCE WORK	CORRECTIVE ACTION
A	- Check pip pin assembly, item 1, in Figures 2 and 3 for: a. security	a. Ensure safety pin, item 2, is secured to bottom of pip pin assembly. Refer to Figures 2 and 3.
B	- Visually inspect the pip pin assembly, item 1, in Figures 2 and 3 for: a. corrosion b. function	a. No corrosion is allowed. If corrosion is evident, contact AHCA for replacement part. b. Ensure smooth movement of the pin when depressing the pushbutton.
C	- Check lanyard, item 3, in Figures 2 and 3 for: a. security b. wear (areas have become worn)	a. Ensure lanyard is secure at attachment points. b. Wear is not permitted. If wear is evident, contact AHCA for replacement parts.
D	- Visually inspect spacer clip, item 4, in Figure 3 for: a. corrosion	a. No corrosion is allowed. If corrosion is evident, contact AHCA for replacement part.

6. TROUBLESHOOTING

There are no unique characteristics which require special troubleshooting techniques.

7. SPECIAL TOOLING

No special test equipment or tools are required. Standard tools are adequate.

8. REMOVAL AND REPLACEMENT

NOTE: Removal is identical for both LH and RH hinged doors.

A. REMOVAL**1) UPPER AND LOWER REMOVABLE DOOR PINS (Refer to Figures 2 & 3)**

- a) With the door open, remove the gas spring. Remove gas spring in accordance with EC 135 AMM, Chapter 52-11-00, 4-2.
- b) Remove safety pins (2) from the bottom of the pip pin assemblies (1, 2 places). Depress top of each pip pin assembly (1) and remove.
- c) Remove the door.

NOTE: Spacer clip (4) will come away with lower door fitting.

B. REPLACEMENT**1) UPPER AND LOWER REMOVABLE DOOR PINS (Refer to Figures 2 & 3)**

- a) Position door, with spacer clip (4) attached over the lower door fitting hole.
- b) Insert both pip pin assemblies (1) and secure using safety pins (2).
- c) Install the gas spring in accordance with EC 135 AMM, Chapter 52-11-00, 4-2.
