

Press Release

Airbus focuses on Connected-Cabin innovations and long-range passenger experience at APEX Expo 2019, Los Angeles USA

- Visit Airbus at the Los Angeles Convention Center, South Hall, Booth #2023 – from Tues 10th to Thurs 12th September
- **Media Briefing** at 9.25am local time, Tuesday 10th September

Toulouse, 4th September 2019 – Airbus will showcase its latest cabin innovations at this year's APEX Expo in Los Angeles, USA – the world's largest dedicated event for the in-flight passenger entertainment experience, connectivity and passenger services.

At its booth Airbus will demonstrate its expanding set of *IoT 'Connected-Cabin' enablers for a personalised passenger experience with its full-scale mockup. When available, the Connected Experience will deliver new opportunities for passengers and airlines with an open ecosystem approach.

Looking further into the future, Airbus will also present its "Airspace Cabin Vision 2030" which demonstrates how Airbus is shaping the future flying experience, inspired by leading airlines, benchmark tech companies and start-ups.

In addition, Airbus will showcase how Airspace is extending the long-haul widebody cabin experience to single-aisle aircraft – such as the new A321XLR equipped with full-flat premium seats, and the spacious A220 in the small single-aisle aircraft market.

With its Connected Cabin concept, Airbus is a finalist for this year's Crystal Cabin Award category: "*Best Customer Journey Experience*". The official awards ceremony will take place on the eve of the Expo – Monday, 9th September.

Media Briefing:

Airbus will host a dedicated briefing for the trade press and also for the national and regional media attending the show, on Tuesday 10th at 09:25 (local time). This will include news, 'pax-ex' developments and new connected-cabin technologies.

Throughout the show Airbus Cabin experts will be available for dedicated media interview opportunities. Please contact us asap to arrange an appointment.
