Airbus Defence and Space showcases cutting-edge products and services to tackle cyber threats at CeBIT 2016

- High-end Cyber Security Capabilities live on booth G28 in Hall 6

Airbus Defence and Space will present for the first time its innovative Cyber Defence Centre capabilities on its booth among cutting-edge cyber security products and services at CeBIT 2016, taking place from March 14th to 18th in Hanover, Germany. The products and services provide sustainable protection against increasingly complex cyber attacks for industries and governmental organisations in Germany and worldwide.

Airbus Defence and Space experts will show the detection, the analysis and the reaction to cyber-attacks in a “Cyber Defence Centre” live on the booth. Frequent procedures of the hackers will be reconstructed and the counter-activities of experts will be shown using Cyber Defence tools and solutions including state-of-the-art technology and threat intelligence.

Airbus Defence and Space will also present its Secure Exchange Gateway, which is accredited by the German Federal Office for Information Security. This solution allows secure information exchange across security domains with different classification.

In addition, the Stormshield range of Network and Endpoint Security products of the subsidiary Stormshield will be shown. They can provide endpoint security solutions, protecting customers from cyber attacks.

- Presentation at stand G28 in Hall 6 at the Hanover Exhibition Center.

About Airbus Defence and Space

Airbus Defence and Space, a division of Airbus Group, is Europe’s number one defence and space enterprise and the second largest space business worldwide. Its activities include space, military aircraft and related systems and services. It employs more than 38,000 people and in 2015 generated revenues of over 13 billion Euros.
