

First ACJ320neo is assembled

Heralds new era in Airbus corporate jets

16th August 2018 – The first ACJ320neo¹ has been assembled on programme, fitted with CFM International LEAP-1A engines and painted in ACJ house-colours, in preparation for a first flight in the coming weeks.

After delivery to Acropolis Aviation of the UK in the last quarter of this year, the aircraft will enter outfitting at AMAC in Basle, Switzerland, where an Alberto Pinto-designed cabin will be installed, and be repainted in the customer's colours.

Like the airliner versions from which it is derived, the ACJ320neo Family features new-generation engines and Sharklets, saving around 15 per cent in fuel and delivering a leap forward in inter-continental range.

The resulting ACJ320neo can fly 25 passengers 6,000 nm/11,100 km or 13 hours - enabling routes such as London to Beijing or Cape Town and Moscow to Los Angeles - while the ACJ319neo can fly eight passengers 6,700 nm/12,500 km or 15 hours.

Featuring the widest and tallest cabins of any large business-jet, the ACJ320neo Family delivers similar operating costs and better residual value, while being about the same size.

Orders for the ACJ320neo Family stand at nine aircraft, comprising three ACJ319neo and six ACJ320neo aircraft.
