**Le Bourget, 20 June 2019** – Nordic Aviation Capital (NAC), the industry's number one regional aircraft lessor has signed a Memorandum of Understanding (MoU) for 20 A220 Family aircraft. The deal was signed at the Paris Air Show between Martin Møller, NAC Chairman and Christian Scherer, Airbus Chief Commercial Officer.

NAC serves over 76 well established airline customers in 51 countries. The agreement represents the first major order for the A220 from a leading regional lessor confirming the versatility of the aircraft to support mainline and regional airline network expansion.

The A220 is the only aircraft purpose built for the 100-150 seat market; it delivers unbeatable fuel efficiency and widebody passenger comfort in a single-aisle aircraft. The A220 brings together state-of-the-art aerodynamics, advanced materials and Pratt & Whitney's latest-generation PW1500G geared turbofan engines to offer at least 20 percent lower fuel burn per seat compared to previous generation aircraft. The A220 offers the performance of larger single-aisle aircraft.

With an order book of 536 aircraft at the end of May 2019, the A220 has all the credentials to win the lion's share of the 100- to 150-seat aircraft market estimated to represent at least 7,000 aircraft over the next 20 years.
