

Mathias ANDRIAMISAINA

Head of ZEROe Demonstrators and Tests
AIRBUS

Mathias has a long-time passion for electrification and eco-efficient aircraft technology. For the past two years he has been in charge of ZEROe technology demonstration.

He currently leads a team whose members are drawn from across Airbus Commercial Aircraft, Defence & Space and Airbus Helicopters. Together they accelerate technology maturity by developing a wide range of demonstrators – from laboratory tests of systems to large-scale flying prototypes.

Prior to his current role, Mathias was part of Airbus' UpNext leadership team. He also has experience in flight testing, laboratory testing, systems engineering, and has been a key contributor to the A350 programme development since the run up to its first flight.
